Re: United States v. Grinnell Corporation, et al.
Civil Action 2785 (Dist.), Rhode Island

Dear Miss Foley:

Thank you for your letter of July 23, 1964.

Enclosed is Exhibit H-1 which was admitted on June 23d to be delivered to you later. We are forwarding a copy to Mr. Story this date.

Sincerely yours, Norman J. Marsh, Jr.

NJM:ms

Enclosure

[fol. 5126] IN THE UNITED STATES DISTRICT COURT

DEFENDANTS' EXHIBIT I

September 12, 1955.

Mr. C. L. Chafee
District Sales Manager

Procter & Gamble Company, Cincinnati, Ohio,
Cleveland District National Account

This is in reply to correspondence and telephone calls on the above subject subscriber from you, Mr. Gates and Mr. Schultz, and will, I hope, set forth our position in relation to this Cleveland District National Account.

Our records show that we have approximately one hundred sixty-six New York and seventy-two District National Accounts, or a total of two hundred thirty-eight, covering a revenue of approximately $5,000,000. One of these subscribers pays in excess of $1,000,000 and, at the moment, has evidenced to us their desire of going into still another location covering an annual service charge of $25,000. These accounts represent a very considerable part of the revenue of the ADT Company and, on the whole, our relationship is a very substantial one.

In the dim distant past, we made the mistake of permitting a modest discount to one of our National users, with a resultant discontent that took many years to cure. As a result, our policy has been, and will remain, to treat each of our users on an equal basis. Therefore,

1. It will not be our policy to renegotiate existing contracts where service is installed and operating, and where contracts have not expired, and which do not contain clauses permitting the subscriber to cancel or renegotiate.
2. We will not offer any blanket concession.
3. We will negotiate each contract on its merits, and feel it our prerequisite to consider price concessions only as a local factor, where cutthroat competition forces such action. We feel that this is a normal way of doing business, and surely the Procter & Gamble

Company, no doubt, in some way, shape or form, meet competitive situations in a similar fashion.

[fol. 5127] Earlier in the year we announced to the Field our experience with the American Can Company when we presented $25,000 worth of contracts which called for an increase of 30%. To refresh your memory, the Purchasing Department of that concern had their Statistical Department analyze our requirement, with the result that the latter came up with the finding that our increase, based as it was on a five year cycle, was entirely within reason.

The above represents not only my conviction, but also the considered thinking of all here in the New York Executive Sales Office.

L. J. O'Brien, General Manager of Sales Production

LJO'B:AS

CC: Mr. D. M. Gates

OFFICE OF THE CHIEF OF POLICE
Massachusetts

Bradford V. Elliott
Chief

June 16, 1964.

United States District Court,
Post Office Building,
Boston, Massachusetts

Re: United States of America, Civil Action File No. 2785

To Whom It May Concern:

In reference to the above captioned subject concerning records of documents showing the number of burglary, hold-up and vault alarms connected directly to and which signal to Police Station, 371 Broadway, Everett, Mass. and the name and type of premises which are protected by such alarms:

Please be advised that alarms are installed in the following places connected to the police station:

Location	Business	Installed By:
verett Savings Bank 46 Broadway	Bank	A.D.T. 60 States St. Boston
Middlesex County National Bank 31 Broadway	Bank	" " " "
verett National Bank 59 Broadway,	Bank	" " " "
nion Super Market	Grocery	Instant Burglar Alarm Lynn, Mass.
lk's Home 2 Church St.	Fraternal Organization	Hyde Park Alarm 1085 Columbus Ave. Bos.
verett Co-Operative Bank 19 Broadway	Bank	Federal Burglar Alarm 1156 Broadway, Somerville

This statement is made under penalty of perjury and is correct according to my best knowledge and belief.

Respectfully submitted, Bradford V. Elliott,
Chief of Police, Everett, Massachusetts

DEFENDANTS' EXHIBIT Z-1

MODIFIED CENTRAL STATION SERVICE

THIS AGREEMENT made this.....day of....., by and between

.....,

hereinafter called the "Contractor", and.....,
hereinafter called the "Subscriber",

WITNESSETH: that for the considerations and covenants hereinafter specified, the parties hereto do, for themselves, their successors and assigns, mutually covenant and agree as follows:

1. The Contractor agrees to install and maintain or cause to be installed and maintained, during the term of this agreement, in the premises of the Subscriber, at

.....,

in the City of....., State of.....,
a Central Station Protective Signaling System, as specified in the schedule on Form 826A attached hereto and made a part hereof, including transmission boxes and wire connections necessary to transmit signals from the premises of the Subscriber to the Contractor's Central Station, and will, subject to the terms and conditions hereof, until the termination of this agreement, maintain such system in good working order, with the understanding that the entire system, including all devices, instruments, appliances and all cables, conduits, connections, tubing, wires, and other materials associated therewith, is and shall be and remain the personal property of the Contractor.

2. The Subscriber agrees to exercise all reasonable care in the handling of the system and to notify the Contractor promptly of any conditions requiring the Contractor's attention. It is mutually understood and agreed by and between the parties hereto that whenever the Central Station Protective Signaling System shall require attention by a representative of the Contractor, whether for repairs, maintenance, nonfunctioning, malfunctioning, or any cause whatsoever, the Contractor shall have a period of twenty-four hours from and after the time of receiving written notice from the Subscriber of the need to give attention to said system, within which to dispatch a representative of the Contractor to the premises of the Subscriber.

3. In the event **Watchman's Reporting Service** is furnished under this agreement, the Subscriber's watchman may signal the Contractor's Central Station not oftener than once per hour from each Combination Night Watch and Fire Alarm Box or twice per hour from each Compulsory Tour Transmitter or Watchman's Security Reporting Station installed hereunder, daily, between the hours of 5 o'clock, P.M., and 8 o'clock, A.M., inclusive, and between the hours of 8 o'clock, A.M., and 5 o'clock, P.M., inclusive, on Saturdays, Sundays and such holidays as are conventional as of this date. The Subscriber shall execute and deliver to the Contractor a "Watch Service Schedule", Form 714, to be supplied by the Contractor, in which the Subscriber will specify, within the foregoing limits, his watchman's reporting schedule and all other details provided for therein, including the designation of the "grace period" which the Contractor shall be instructed to allow the watchman before investigating any failure to signal the Contractor's Central Station as therein provided for. On any failure of the Subscriber's watchman to signal the Central Station in accordance with the aforesaid "Watch Service Schedule" then in force, the Contractor will, after the expiration of the grace period therein prescribed and in the event that no signal has been received from the watchman during such grace period, attempt to telephone the Subscriber's premises by public telephone. Should such attempt to communicate with the Subscriber's premises by public telephone be unsuccessful, it is mutually understood and agreed by and between the parties hereto that the Contractor's sole obligation shall consist in attempting to notify designated representatives of the Subscriber by public telephone of the watchman's failure to signal.

It is understood and agreed by and between the parties hereto that the Subscriber's watchman is neither an agent nor an employee of the Contractor and that the Contractor is not liable for any act, or failure to act, on the part of such watchman.

The Contractor will furnish to the Subscriber, at such intervals as the Subscriber may request, reports of any failures to signal and the reasons given by the watchman for such failures.

4. In the event **Emergency Call Service** is furnished under this agreement, it is mutually understood and agreed by and between the parties hereto, that the only obligation of the Contractor, upon receipt of emergency signals received in the Contractor's Central Station, shall be to endeavor to notify the police department at.....

....., by public telephone, of the receipt of such alarm, and to endeavor similarly to notify the designated representatives of the Subscriber, by public telephone, at such telephone numbers as may be provided by the Subscriber for this purpose.

5. In the event **Manual Fire Alarm Service** is furnished under this agreement, it is mutually understood and agreed by and between the parties hereto, that the only obligation of the Contractor, upon receipt at its Central Station of any alarm signal emanating from the said alarm system, shall be to endeavor to notify the.....

.....department at .....,
by public telephone, of the receipt of such alarm, and to endeavor similarly to notify the designated representatives of the Subscriber, by public telephone, at such telephone numbers as may be provided by the Subscriber for this purpose.

6. In the event **Automatic Supervisory Service** is furnished under this agreement, it is mutually understood and agreed by and between the parties hereto, that the Subscriber shall execute and deliver to the Contractor "Directions for the Setting of Automatic Signaling Devices Employed in Connection With Industrial Processes and Heating Systems", Form 792, to be supplied by the Contractor, in which form the Subscriber shall specify the settings at which it is intended that signaling devices shall operate. Upon such operation and consequent receipt at Contractor's Central Station of a signal from any signaling device installed in the premises of the Subscriber hereunder, indicating the existence of a condition requiring the Subscriber's attention, the Contractor agrees to make reasonable efforts to notify the Subscriber or his designated representative thereof.

7. In the event **Sprinkler Supervisory and Waterflow Alarm** or **Automatic Fire Alarm Service** is furnished under this agreement, it is mutually understood and agreed by and between the parties hereto, that the only obligation of the Contractor, upon receipt at its Central Station of any alarm signal emanating from the said alarm system,

shall be to endeavor to notify the.....department at .....,
by public telephone, of the receipt of such alarm, and to endeavor similarly to notify the designated representatives of the Subscriber, by public telephone, at such telephone numbers as may be provided by the Subscriber for this purpose.

It is mutually understood and agreed by and between the parties hereto, that the Subscriber shall be responsible for the proper care and maintenance of the sprinkler system and the elements thereof and that the Contractor's sole obligation upon receipt of a signal indicating abnormal condition of any part of the sprinkler system shall consist in attempting to notify designated representatives of the Subscriber, by public telephone, that such signal has been received.

Where Sprinkler Supervisory and Waterflow Alarm Service is furnished, the Subscriber hereby agrees to replace, at his sole expense, all wet and dry valves now installed which are not acceptable to the Board of Fire Underwriters or other authority having jurisdiction when equipped with the Contractor's signaling devices, and to furnish any necessary water through the Subscriber's meter and at the Subscriber's own expense.

Where Automatic Fire Alarm Service is furnished the Subscriber agrees to place hoods over all open forges and open fires, and to pipe all boiler blow-offs and steam exhausts outside of the buildings to be protected.

8. The Subscriber hereby agrees to pay to the Contractor, its agents or assigns, the sum of.....

.....Dollars

($.....) upon signing of this agreement, and to pay in addition, the sum of.....

.....Dollars

($.....), per annum, annually in advance, for the period of five years from the date service is operative under this agreement, and thereafter, to pay the said sum per annum, annually in advance, until the termination of this agreement, which is terminable at the end of said five year period, provided thirty days' prior notice in writing of desire to terminate is given by either party to the other; otherwise to continue after expiration of said five year period until such thirty days' prior written notice is given by either party to the other. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

9. The Subscriber hereby authorizes and empowers the Contractor, its agents or assigns, to install and maintain the aforesaid systems in said premises and to inspect, test and repair the systems, and further, to make any changes in or alterations to the systems made at the request of the Subscriber or made necessary by any changes in the Subscriber's premises, property or equipment, after the original installation has been completed, at the cost of the Subscriber. The Subscriber agrees to furnish any necessary electric current through the Subscriber's meter and at the Subscriber's own expense. It is mutually agreed that the work of installation and the Contractor's periodic inspections and tests of the systems shall be performed between the hours of 8 o'clock, A.M., and 5 o'clock, P.M., exclusive of Saturdays, Sundays and holidays.

10. It is understood and agreed that the Contractor may remove or upon written notice to the Subscriber abandon said systems, in whole or in part, including all devices, instruments, appliances and all cables, conduits, connections, tubing, wires, and any other materials associated therewith, upon termination of this agreement by lapse of time, default in the payment of any moneys due hereunder, or otherwise, without any obligation to repair or redecorate any portion of the Subscriber's premises upon removal of the Contractor's systems, and that the removal or abandonment of the systems as aforesaid shall not be held to constitute a waiver of the right of the Contractor to collect any charges which have accrued or may accrue hereunder.

11. The Subscriber hereby agrees that the Contractor shall have the right to increase or decrease the annual charge provided for herein at any time or times after the expiration of one year from the date service is operative under this agreement or after one year from the effective date of this agreement if an effective date is herein specified, upon giving the Subscriber written notice sixty days in advance of the effective date of such increase or decrease, and if the Subscriber is unwilling to pay any such increased charge, the Subscriber may cancel the then unexpired term of this agreement by notifying the Contractor in writing thirty days prior to the otherwise effective date of any such increase. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

12. This agreement may be cancelled, without previous notice, at the option of the Contractor, in case the Contractor's Central Station, connecting wires or equipment within the Subscriber's premises are destroyed by fire or other catastrophe, or so substantially damaged that it is impracticable to continue service, and may likewise be cancelled at the option of the Subscriber, in the event that the Subscriber's plant is so destroyed or damaged. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

13. This agreement may be terminated at the option of the Contractor at any time in the event that the Contractor is unable either to secure or retain the connections or privileges necessary for the transmission of signals by means of conductors between the Subscriber's premises and the Contractor's Central Station or between the Contractor's Central Station and the municipal fire or police department and the Contractor shall not be liable for any damages or subject to any penalty as a result of such termination. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

14. It is understood and agreed that the Contractor's obligation relates to the maintenance solely of the specified protective signaling systems, and that the Contractor is in no way obligated to maintain, repair, service, replace, operate or assure the operation of the property, system or any device or devices of the Subscriber or of others to which the Contractor's said systems are attached.

15. It is agreed by and between the parties hereto: that the Contractor is not an insurer; that the payments hereinbefore named are based solely on the value of the services provided for herein; that, from the nature of the services to be rendered, it is impracticable and extremely difficult to fix the actual damages, if any, which may proximately result from a failure on the part of the Contractor to perform any of its obligations hereunder; that, in case of the failure of the Contractor to perform any of its obligations hereunder, and a resulting loss to the Subscriber, the Contractor's liability hereunder shall be limited to and fixed at a sum equal to ten percent of the annual service charge, hereinabove provided for, but in no event amounting to less than the sum of fifty dollars, as liquidated damages, and not as a penalty, and this liability shall be exclusive.

16. The Contractor assumes no liability for delays in installation of the equipment, or for interruptions of service due to strikes, riots, floods, fires, acts of God or any cause beyond the control of the Contractor, and will not be required to supply service to the Subscriber while interruption of service due to any such cause shall continue.

17. This agreement is not assignable by either party except upon the written consent of the other party first being obtained.

18. This agreement is not binding unless approved in writing by an authorized representative of the Company described above as the Contractor. In the event of failure of approval, as aforesaid, the only liability of the Contractor shall be to return to the Subscriber the amount, if any, paid to the Contractor upon the signing of this agreement.

19. There are no verbal understandings changing or modifying any of the terms of this agreement.

DEFENDANTS' EXHIBIT Z-2

CENTRAL STATION PROTECTIVE SIGNALING SERVICE

THIS AGREEMENT made this.....day of.....by and between

.....,

hereinafter called the "Contractor", and.....,
hereinafter called the "Subscriber",

WITNESSETH: that for the considerations and covenants hereinafter specified, the parties hereto do, for themselves, their successors and assigns, mutually covenant and agree as follows:

1. The Contractor agrees to install and maintain or cause to be installed and maintained, during the term of this agreement, in the premises of the Subscriber, at

.....,

in the City of....., State of.....,
a Central Station Protective Signaling System, as specified in the schedule on Form 827A attached hereto and made a part hereof, including transmission boxes and wire connections necessary to transmit signals from the premises of the Subscriber to the Contractor's Central Station, and will, subject to the terms and conditions hereof, until the termination of this agreement, maintain such system in good working order, with the understanding that the entire system, including all devices, instruments, appliances and all cabinets, cables, conduits, connections, foils, screens, springs, tubing, wires, and other materials associated therewith, is and shall be and remain the personal property of the Contractor.

2. In the event **Watchman's Reporting Service** is furnished under this agreement, the Subscriber's watchman may signal the Contractor's Central Station not oftener than once per hour from each Combination Night Watch and Fire Alarm Box or twice per hour from each Compulsory Tour Transmitter or Watchman's Security Reporting Station installed hereunder, daily, between the hours of 5 o'clock, P.M., and 8 o'clock, A.M., inclusive, and between the hours of 8 o'clock, A.M., and 5 o'clock, P.M., inclusive, on Saturdays, Sundays and such holidays as are conventional as of this date. The Subscriber shall execute and deliver to the Contractor a "Watch Service Schedule", Form T14, to be supplied by the Contractor, in which the Subscriber will specify, within the foregoing limits, his watchman's reporting schedule and all other details provided for therein, including the designation of the "grace period" which the Contractor shall be instructed to allow the watchman before investigating any failure to signal the Contractor's Central Station as therein provided for. On any failure of the Subscriber's watchman to signal the Central Station in accordance with the aforesaid "Watch Service Schedule" then in force, the Contractor will, after the expiration of the grace period therein prescribed and in the event that no signal has been received from the watchman during such grace period, telephone the Subscriber's premises, or send a representative to the premises at a cost to the Subscriber of two dollars for each trip, to ascertain the cause of such failure, and, in case the investigation shall disclose inability of the watchman to perform his duties, the Contractor will hold its representative on the premises, pending the arrival of the Subscriber or his representative, for a period not to exceed two hours and at a cost to the Subscriber of two dollars and fifty cents per hour.

It is understood and agreed by and between the parties hereto that the Subscriber's watchman is neither an agent nor an employee of the Contractor and that the Contractor is not liable for any act, or failure to act, on the part of such watchman.

The Contractor will furnish to the Subscriber, at such intervals as he may request, reports of any failures to signal and the reasons given by the watchman for such failures.

3. In the event **Emergency Call or Holdup Alarm Service** is furnished under this agreement, the Contractor, on receipt of an emergency call or holdup alarm signal from the Subscriber's premises, agrees to transmit the alarm promptly to headquarters of the municipal police department.

4. In the event **Manual Fire Alarm Service** is furnished under this agreement, the Contractor agrees to transmit to the municipal fire department all fire alarm signals received at its Central Station from the Manual Fire Alarm System installed hereunder.

5. In the event **Automatic Supervisory Service** is furnished under this agreement, it is mutually understood and agreed by and between the parties hereto, that the Subscriber shall execute and deliver to the Contractor "Directions for the Setting of Automatic Signaling Devices Employed in Connection With Industrial Processes and Heating Systems", Form 792, to be supplied by the Contractor, in which form the Subscriber shall specify the settings at which it is intended that signaling devices shall operate. Upon such operation and consequent receipt at Contractor's Central Station of a signal from any signaling device installed in the premises of the Subscriber hereunder, indicating the existence of a condition requiring the Subscriber's attention, the Contractor agrees to make reasonable efforts to notify the Subscriber or his designated representative thereof.

6. In the event **Sprinkler Supervisory and Waterflow Alarm** or **Automatic Fire Alarm Service** is furnished under this agreement, the Contractor agrees to transmit to the municipal fire department all fire alarm signals received at its Central Station from the system or systems installed hereunder, unless it is the best judgment of the Contractor that the causes of such signals shall first be investigated by telephoning or dispatching a representative to the Subscriber's premises.

Where Sprinkler Supervisory and Waterflow Alarm Service is furnished, the Subscriber hereby agrees to replace, at his sole expense, all wet and dry valves now installed which are not acceptable to the Board of Fire Underwriters or other authority having jurisdiction when equipped with the Contractor's signaling devices, and to furnish any necessary water through the Subscriber's meter and at the Subscriber's own expense.

Where Automatic Fire Alarm Service is furnished the Subscriber agrees to place hoods over all open forges and open fires, and to pipe all boiler blow-offs and steam exhausts outside of the buildings to be protected.

7. In the event **Burglary Protection Service** is furnished under this agreement, the Contractor, on receipt of a burglar alarm signal from the Subscriber's premises, agrees to send its representative to said premises to act as agent of and in the interest of the Subscriber. If provided with a key by the Subscriber for such purpose, the representative will enter the premises and search them. The Subscriber hereby authorizes and directs the Contractor to cause the arrest of any person or persons unauthorized to enter his premises and to hold him or them until released by the Subscriber or an authorized known representative, and in such cases to indemnify the Contractor against any liability, cost or expense in consequence of such arrest.

The Subscriber agrees to furnish the Contractor a list of the names and individual signatures of all persons who shall have the right to enter the premises of the Subscriber between the regularly scheduled times for closing and opening the premises and who may be called upon for a key to enter the premises of the Subscriber, during such periods.

If requested, the Contractor agrees to furnish the Subscriber daily, a report in writing showing the times the Subscriber's premises were irregulary opened the preceding day (between the regularly scheduled times for closing and opening the premises) and if also requested, a weekly report in writing showing the times said premises were regularly opened and closed each day.

8. In the event **Intrusion Detection Service** is furnished under this agreement, the Contractor, on receipt of a signal indicating interruption of a light beam while the System is in operation, agrees to notify the municipal police department, and to make a reasonable effort to notify the Subscriber or his designated representative, of the receipt of such signal, unless it is the best judgment of the Contractor that the signal was caused by snow, fog, rain or other action of the elements, or by failure of the System's power supply or of the conductors between the System and the Contractor's Central Station, or other similar cause beyond the control of the Contractor, and in such event the Contractor will make a reasonable effort to notify the Subscriber or his designated representative that such a condition exists. The service hereunder shall be considered as temporarily suspended from the time that a signal is received until the System is again placed in operation.

If service is temporarily suspended for any of the reasons specified hereinabove or for any other reason, or in the event the Contractor is notified of the need for repairs to the System, the Contractor shall dispatch a representative to the Subscriber's premises to attempt to re-establish the service, during the next following regular working day (8:00 A.M. to 5:00 P.M., Mondays through Fridays, exclusive of holidays).

Whenever notification is to be given to the Subscriber, as provided for herein, the Contractor shall make reasonable effort to convey such notice by telephone to the Subscriber or his designated representative at the Subscriber's premises; if not successful in giving notification in that manner, the Contractor shall give such notice either orally or in writing, by sending notification by telephone, telegraph or messenger to the address or addresses which the Subscriber shall have theretofore filed with the Contractor for that purpose.

The Subscriber agrees to furnish the Contractor a list of the names and individual signatures of all persons who shall have the right to enter the area to be protected during the regularly scheduled times for the detection System to be in operation and who may be called upon to provide access to the System and to the protected area, during such periods.

The Contractor (upon written request therefor) agrees to furnish the Subscriber daily, a report in writing showing the times at which the System transmitted interruption signals during the preceding day and if requested by the Subscriber a weekly report in writing showing the times at which the System was placed in service and out of service, each day.

It is understood and agreed that the function of the Intrusion Detection System is to transmit a signal to the Contractor's Central Station in the event that the path or continuity of any light beam is interrupted, from any cause or in any manner, while the System is in operation.

It is understood and agreed that it is the Subscriber's obligation to place the Intrusion Detection System in operation and to signal the Contractor's Central Station when the System has been placed in operation. The Contractor assumes no responsibility for the functioning of the System until a connection has been established between the System and the Contractor's Central Station, except that in the event the connection to the Contractor's Central Station has not been established within one hour after the Subscriber's customary time for placing the System in operation, the Contractor will make a reasonable effort to notify the Subscriber or his designated representative of such condition by telephone and until such time as connection to the Central Station has been established, the service provided for hereunder shall be considered as temporarily suspended.

The Subscriber authorizes the Contractor to connect the Intrusion Detection System to the Subscriber's existing power or lighting circuits at a point which assures the maximum reliability and continuity of power.

9. The Subscriber hereby agrees to pay the Contractor, its agents or assigns, the sum of.....

.....Dollars

($.....) upon signing of this agreement, and to pay in addition, the sum of.....

.....Dollars

($.....) per annum, annually in advance, for the period of five years from the date service is operative under this agreement, and thereafter, to pay the said

ADT® Electric Protection Services AGAINST FIRE, BURGLARY, HOLDUP

sum per annum, annually in advance, until the termination of this agreement, which is terminable at the end of said five year period, provided thirty days' prior notice in writing of desire to terminate is given by either party to the other; otherwise to continue after expiration of said five year period until such thirty days' prior written notice is given by either party to the other. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

10. The Subscriber hereby authorizes and empowers the Contractor, its agents or assigns, to install and maintain the aforesaid systems in said premises and to inspect, test and repair the systems, and, further, to make any changes in or alterations to the systems made at the request of the Subscriber or made necessary by any changes in the Subscriber's premises, property or equipment, after the original installation has been completed, at the cost of the Subscriber. The Subscriber agrees to furnish any necessary electric current through the Subscriber's meter and at the Subscriber's own expense. It is mutually agreed that the work of installation and the Contractor's periodic inspections and tests of the systems shall be performed between the hours of 8:00 o'clock, A.M., and 5 o'clock, P.M., exclusive of Saturdays, Sundays and holidays.

11. It is understood and agreed that the Contractor may remove or upon written notice to the Subscriber abandon said systems, in whole or in part, including all devices, instruments, appliances and all cabinets, cables, conduits, connections, foils, screens, springs, tubing, wires, and any other materials associated therewith, upon termination of this agreement by lapse of time, default in the payment of any moneys due hereunder, or otherwise, without any obligation to repair or redecorate any portion of the Subscriber's premises upon removal of the Contractor's systems, and that the removal or abandonment of the systems as aforesaid shall not be held to constitute a waiver of the right of the Contractor to collect any charges which have accrued or may accrue hereunder.

12. The Subscriber hereby agrees that the Contractor shall have the right to increase or decrease the annual charge provided for herein at any time or times after the expiration of one year from the date such system is operative under this agreement or after one year from the effective date of this agreement if an effective date is herein specified, upon giving the Subscriber written notice sixty days in advance of the effective date of such increase or decrease, and if the Subscriber is unwilling to pay any such increased charge, the Subscriber may cancel the then unexpired term of this agreement by notifying the Contractor in writing thirty days prior to the otherwise effective date of any such increase. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

13. This agreement may be cancelled, without previous notice, at the option of the Contractor, in case the Contractor's Central Station, connecting wires or equipment within the Subscriber's premises are destroyed by fire or other catastrophe, or so substantially damaged that it is impracticable to continue service, and may likewise be cancelled at the option of the Subscriber, in the event that the Subscriber's plant is so destroyed or damaged. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

14. This agreement may be terminated at the option of the Contractor at any time in the event that the Contractor is unable either to secure or retain the connections or privileges necessary for the transmission of signals by means of conductors between the Subscriber's premises and the Contractor's Central Station or between the Contractor's Central Station and the municipal fire or police department and the Contractor shall not be liable for any damages or subject to any penalty as a result of such termination. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

15. It is understood and agreed that the Contractor's obligation relates to the maintenance solely of the specified protective signaling systems, and that the Contractor is in no way obligated to maintain, repair, service, replace, operate or assure the operation of the property, system or any device or devices of the Subscriber or of others to which the Contractor's said systems are attached.

16. It is agreed by and between the parties hereto: that the Contractor is not an insurer; that the payments hereinbefore named are based solely on the value of the services provided for herein; that, from the nature of the services to be rendered, it is impracticable and extremely difficult to fix the actual damages, if any, which may proximately result from a failure on the part of the Contractor to perform any of its obligations hereunder; that, in case of the failure of the Contractor to perform any of its obligations hereunder, and a resulting loss to the Subscriber, the Contractor's liability hereunder shall be limited to and fixed at a sum equal to ten percent of the annual service charge, hereinabove provided for, but in no event amounting to less than the sum of fifty dollars, as liquidated damages, and not as a penalty, and this liability shall be exclusive.

17. The Contractor assumes no liability for delays in installation of the equipment, or for interruptions of service due to strikes, riots, floods, fires, acts of God or any cause beyond the control of the Contractor, and will not be required to supply service to the Subscriber while interruption of service due to any such cause shall continue.

18. This agreement is not assignable by either party except upon the written consent of the other party first being obtained.

19. This agreement is not binding unless approved in writing by an authorized representative of the Company described above as the Contractor. In the event of failure of approval, as aforesaid, the only liability of the Contractor shall be to return to the Subscriber the amount, if any, paid to the Contractor upon the signing of this agreement.

20. There are no verbal understandings changing or modifying any of the terms of this agreement.

DEFENDANTS' EXHIBIT Z-3

CENTRAL STATION BURGLARY AND HOLDUP PROTECTION SERVICE

DEFENDANTS' EXHIBIT Z-3

CENTRAL STATION BURGLARY AND HOLDUP PROTECTION SERVICE

THIS AGREEMENT made this.....day of.....by and between

.....

hereinafter called the "Contractor", and.....
hereinafter called the "Subscriber",

WITNESSETH: that for the considerations and covenants hereinafter specified, the parties hereto do, for themselves, their successors and assigns, mutually covenant and agree as follows:

1. The Contractor agrees to install and maintain or cause to be installed and maintained, during the term of this agreement, in the premises of the Subscriber, at

....., in the City of.....

State of....., a Central Station Burglar Alarm and Holdup Alarm System, as specified in the schedule on the reverse side hereof, including transmission boxes and wire connections, necessary to transmit signals from the premises of the Subscriber to the Contractor's Central Station, and will, subject to the terms and conditions hereof, until the termination of this agreement, maintain such system in good working order, with the understanding that the entire system, including all devices, instruments, appliances and all connections, wires, conduits, foils, screens, cabinets, springs and other materials associated therewith, is and shall be and remain the personal property of the Contractor.

2. The Contractor, on receipt of a burglar alarm signal from the Subscriber's premises, agrees to send its representative to said premises to act as agent of and in the interest of the Subscriber. If provided with a key by the Subscriber for such purpose, the representative will enter the premises and search them. The Subscriber hereby authorizes and directs the Contractor to cause the arrest of any person or persons unauthorized to enter his premises and to hold him or them until released by the Subscriber or an authorized known representative, and in such cases to indemnify the Contractor against any liability, cost or expense in consequence of such arrest.

3. In the event holdup alarm service is furnished under this agreement, the Contractor, on receipt of a holdup alarm signal from the Subscriber's premises, agrees to transmit the alarm promptly to headquarters of the public police department.

4. The Subscriber agrees to furnish the Contractor a list of the names and individual signatures of all persons who shall have the right to enter the premises of the Subscriber between the regularly scheduled times for closing and opening the premises and who may be called upon for a key to enter the premises of the Subscriber, during such periods.

5. If requested, the Contractor agrees to furnish the Subscriber daily, a report in writing showing the times the Subscriber's premises were irregularly opened the preceding day (between the regularly scheduled times for closing and opening the premises) and if also requested, a weekly report in writing showing the times said premises were regularly opened and closed each day.

6. The Subscriber hereby agrees to pay the Contractor, its agents or assigns, the sum of.....

.....Dollars

($.....) upon signing of this agreement, and to pay in addition, the sum of.....

.....Dollars

($.....), per annum, annually in advance, for the period of five years from the date such system is operative under this agreement, and thereafter, to pay the said sum per annum, annually in advance, until the termination of this agreement, which is terminable at the end of said five year period, provided thirty days' prior notice in writing of desire to terminate is given by either party to the other; otherwise to continue after expiration of said five year period until such thirty days' prior written notice is given by either party to the other. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

7. The Subscriber hereby authorizes and empowers the Contractor, its agents or assigns, to install and maintain the aforesaid system in said premises and to inspect, test and repair it, and, further, to make any changes in or alterations to the system made at the request of the Subscriber or made necessary by any changes in the Subscriber's premises, property or equipment, after the original installation has been completed, at the cost of the Subscriber. The Subscriber agrees to furnish any necessary electric current through the Subscriber's meter and at the Subscriber's own expense. It is mutually agreed that the work of installation and the Contractor's periodic inspections and tests of the system shall be performed between the hours of 8 o'clock, A.M., and 5 o'clock, P.M., exclusive of Saturdays, Sundays and holidays.

8. It is understood and agreed that the Contractor may remove or upon written notice to the Subscriber abandon said system, in whole or in part, including all devices, instruments, appliances, and all connections, wires, conduits, foils, screens, cabinets, springs and any other materials associated therewith, upon termination of this agreement by lapse of time, default in the payment of any moneys due hereunder, or otherwise, without any obligation to repair or redecorate any portion of the Subscriber's premises upon removal of the Contractor's system, and that the removal or abandonment of the system as aforesaid shall not be held to constitute a waiver of the right of the Contractor to collect any charges which have accrued or may accrue hereunder.

9. The Subscriber hereby agrees that the Contractor shall have the right to increase or decrease the annual charge provided for herein at any time or times after the expiration of one year from the date such system is operative under this agreement or after one year from the effective date of this agreement if an effective date is herein specified, upon giving the Subscriber written notice sixty days in advance of the effective date of such increase or decrease, and if the Subscriber is unwilling to pay any such increased charge, the Subscriber may cancel the then unexpired term of this agreement by notifying the Contractor in writing thirty days prior to the otherwise effective date of any such increase. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

10. This agreement may be cancelled, without previous notice, at the option of the Contractor, in case the Contractor's Central Station, connecting wires or equipment within the Subscriber's premises are destroyed by fire or other catastrophe, or so substantially damaged that it is impracticable to continue service, and may likewise be cancelled at the option of the Subscriber, in the event that the Subscriber's plant is so destroyed or damaged. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

11. This agreement may be terminated at the option of the Contractor at any time in the event that the Contractor is unable either to secure or retain the connections or privileges necessary for the transmission of signals by means of conductors between the Subscriber's premises and the Contractor's Central Station or between the Contractor's Central Station and the municipal police department and the Contractor shall not be liable for any damages or subject to any penalty as a result of such termination. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

12. It is understood and agreed that the Contractor's obligation relates to the maintenance solely of the specified protective signaling system, and that the Contractor is in no way obligated to maintain, repair, service, replace, operate or assure the operation of the property, system or any device or devices of the Subscriber or of others to which the Contractor's said system is attached.

13. It is agreed by and between the parties hereto: that the Contractor is not an insurer; that the payments hereinbefore named are based solely on the value of the services provided for herein; that, from the nature of the services to be rendered, it is impracticable and extremely difficult to fix the actual damages, if any, which may proximately result from a failure on the part of the Contractor to perform any of its obligations hereunder; that, in case of the failure of the Contractor to perform any of its obligations hereunder, and a resulting loss to the Subscriber, the Contractor's liability hereunder shall be limited to and fixed at a sum equal to ten percent of the annual service charge, hereinabove provided for, but in no event amounting to less than the sum of fifty dollars, as liquidated damages, and not as a penalty, and this liability shall be exclusive.

14. The Contractor assumes no liability for delays in installation of the equipment, or for interruptions of service due to strikes, riots, floods, fires, acts of God or any cause beyond the control of the Contractor, and will not be required to supply service to the Subscriber while interruption of service due to any such cause shall continue.

15. This agreement is not assignable by either party except upon the written consent of the other party first being obtained.

16. This agreement is not binding unless approved in writing by an authorized representative of the Company described above as the Contractor. In the event of failure of approval, as aforesaid, the only liability of the Contractor shall be to return to the Subscriber the amount, if any, paid to the Contractor upon the signing of this agreement.

17. There are no verbal understandings changing or modifying any of the terms of this agreement.

DIRECT CONNECTED SERVICE

THIS AGREEMENT made this.....day of.....by and between

.....,

hereinafter called the "Contractor", and.....,
hereinafter called the "Subscriber",

WITNESSETH: that for the considerations and covenants hereinafter specified, the parties hereto do, for themselves, their successors and assigns, mutually covenant and agree as follows:

1. The Contractor agrees to install and maintain or cause to be installed and maintained, during the term of this agreement, in the premises of the Subscriber, at

.....,

in the City of....., State of.....,

a Direct Connected Protective Signaling System as specified in the schedule on the reverse side hereof, connected to.....Department and will, subject to the terms and conditions hereof, during the term of this agreement, make periodic inspections of the system and make such repairs and adjustments as may be necessary for the proper operation and maintenance of such system in good working order, the Subscriber agreeing, nevertheless, to exercise all reasonable care in the handling thereof and to notify the Contractor promptly of any conditions requiring the Contractor's attention. It is mutually understood and agreed by and between the parties hereto that whenever the Direct Connected Protective Signaling System specified in the schedule on the reverse side hereof shall require attention by a representative of the Contractor, whether for repairs, maintenance, nonfunctioning, malfunctioning or any cause whatsoever, the Contractor shall have a period of twenty-four hours from and after the time of receiving written notice from the Subscriber of the need to give attention to said system, within which to dispatch a representative of the Contractor to the premises of the Subscriber. It is further understood and agreed by and between the parties hereto that the entire system, including all devices, instruments, appliances and all cabinets, conduits, connections, foils, screens, springs, tubing, wires and other materials associated therewith, is and shall be and remain the personal property of the Contractor.

2. In the event Waterflow Alarm Service is furnished, the Subscriber hereby agrees to replace, at his sole expense, all wet and dry valves now installed which are not acceptable to the Board of Fire Underwriters or other authority having jurisdiction when equipped with the Contractor's signaling devices, and to furnish any necessary water through the Subscriber's meter and at the Subscriber's own expense.

In the event Automatic Fire Alarm Service is furnished the Subscriber agrees to place hoods over all open forges and open fires, and to pipe all boiler blow-offs and steam exhausts outside of the buildings to be protected.

3. The Subscriber hereby agrees to pay to the Contractor, its agents or assigns, the sum of.....

.....Dollars

($.....) upon signing of this agreement, and to pay in addition the sum of.....

.....Dollars

($.....), per annum, annually in advance, for the period of five years from the date such system is operative under this agreement, and thereafter, to pay the said sum per annum, annually in advance, until the termination of this agreement, which is terminable at the end of said five year period, provided thirty days' prior notice in writing of desire to terminate is given by either party to the other; otherwise to continue after expiration of said five year period until such thirty days' prior written notice is given by either party to the other. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

4. The Subscriber hereby authorizes and empowers the Contractor, its agents or assigns, to install and maintain the aforesaid system in said premises and to inspect, test and repair it, and, further, to make any changes in or alterations to the system made at the request of the Subscriber or made necessary by any changes in the Subscriber's premises, property or equipment, after the original installation has been completed, at the cost of the Subscriber. The Subscriber agrees to furnish any necessary electric current through the Subscriber's meter and at the Subscriber's own expense. It is mutually agreed that the work of installation and the Contractor's periodic inspections and tests of the system shall be performed between the hours of 8 o'clock, A.M., and 5 o'clock, P.M., exclusive of Saturdays, Sundays and holidays.

5. It is understood and agreed that the Contractor may remove or upon written notice to the Subscriber abandon said system, in whole or in part, including all devices, instruments, appliances and all cabinets, conduits, connections, foils, screens, springs, tubing, wires and any other materials associated therewith, upon termination of this agreement by lapse of time, default in the payment of any moneys due hereunder, or otherwise, without any obligation to repair or redecorate any portion of the Subscriber's premises upon removal of the Contractor's system, and that the removal or abandonment of the system as aforesaid shall not be held to constitute a waiver of the right of the Contractor to collect any charges which have accrued or may accrue hereunder.

6. The Subscriber hereby agrees that the Contractor shall have the right to increase or decrease the annual charge provided for herein at any time or times after the expiration of one year from the date such system is operative under this agreement or after one year from the effective date of this agreement if an effective date is herein specified, upon giving the Subscriber written notice sixty days in advance of the effective date of such increase or decrease, and if the Subscriber is unwilling to pay any such increased charge, the Subscriber may cancel the then unexpired term of this agreement by notifying the Contractor in writing thirty days prior to the otherwise effective date of any such increase. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

7. This agreement may be terminated at the option of the Contractor at any time in the event that the Contractor is unable either to secure or retain the connections or privileges necessary for the transmission of signals by means of conductors between the Subscriber's premises and the municipal fire or police departments, or other place of connection, and the Contractor shall not be liable for any damages or subject to any penalty as a result of such termination. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

8. It is understood and agreed that the Contractor's obligation relates to the maintenance solely of the specified protective signaling system, and that the Contractor is in no way obligated to maintain, repair, service, replace, operate or assure the operation of the property, system or any device or devices of the Subscriber or of others to which the Contractor's said system is attached.

9. It is agreed by and between the parties hereto: that the Contractor is not an insurer; that the payments hereinbefore named are based solely on the value of the services provided for herein; that, from the nature of the services to be rendered, it is impracticable and extremely difficult to fix the actual damages, if any, which may proximately result from a failure on the part of the Contractor to perform any of its obligations hereunder; that, in case of the failure of the Contractor to perform any of its obligations hereunder, and a resulting loss to the Subscriber, the Contractor's liability hereunder shall be limited to and fixed at a sum equal to ten percent of the annual service charge, hereinabove provided for, but in no event amounting to less than the sum of fifty dollars, as liquidated damages, and not as a penalty, and this liability shall be exclusive. The Department or other organization to which the connection is made may invoke the limitation and liquidation provisions hereof against any claims by the subscriber due to any failure of such Department or organization.

10. The Contractor assumes no liability for delays in installation of the equipment, or for interruptions of service due to strikes, riots, floods, fires, acts of God or any cause beyond the control of the Contractor, and will not be required to supply service to the Subscriber while interruption of service due to any such cause shall continue.

11. This agreement is not assignable by either party except upon the written consent of the other party first being obtained.

12. This agreement is not binding unless approved in writing by an authorized representative of the Company described above as the Contractor. In the event of failure of approval, as aforesaid, the only liability of the Contractor shall be to return to the Subscriber the amount, if any, paid to the Contractor upon the signing of this agreement.

13. There are no verbal understandings changing or modifying any of the terms of this agreement.

LOCAL ALARM SERVICE

THIS AGREEMENT made this.....day of....., by and between

.....,

hereinafter called the "Contractor", and.....,
hereinafter called the "Subscriber",

WITNESSETH: that for the considerations and covenants hereinafter specified, the parties hereto do, for themselves, their successors and assigns, mutually covenant and agree as follows:

1. The Contractor agrees to install and maintain or cause to be installed and maintained, during the term of this agreement, in the premises of the Subscriber, at

.....,

in the City of.....State of .....,
a Local Alarm System as specified in the schedule on the reverse side hereof, and will, subject to the terms and conditions hereof, during the term of this agreement, make periodic inspections of the system and make such repairs and adjustments as may be necessary for the proper operation and maintenance of such system in good working order, the Subscriber agreeing, nevertheless, to exercise all reasonable care in the handling thereof and to notify the Contractor promptly of any conditions requiring the Contractor's attention. It is mutually understood and agreed by and between the parties hereto that whenever the Local Alarm System specified in the schedule on the reverse side hereof shall require attention by a representative of the Contractor, whether for repairs, maintenance, nonfunctioning, malfunctioning or any cause whatsoever, the Contractor shall have a period of twenty-four hours from and after the time of receiving written notice from the Subscriber of the need to give attention to said system, within which to dispatch a representative of the Contractor to the premises of the Subscriber. It is further understood and agreed by and between the parties hereto that the entire system, including all devices, instruments, appliances and all connections, wires, conduits, tubing, foils, screens, cabinets, springs and other materials associated therewith, is and shall be and remain the personal property of the Contractor.

2. The Subscriber hereby agrees to pay to the Contractor, its agents or assigns, the sum of.....

.....Dollars

($.....) upon signing of this agreement, and to pay in addition the sum of.....

.....Dollars

($.....), per annum, annually in advance, for the period of five years from the date such system is operative under this agreement, and thereafter, to pay the said sum per annum, annually in advance, until the termination of this agreement, which is terminable at the end of said five year period, provided thirty days' prior notice in writing of desire to terminate is given by either party to the other; otherwise to continue after expiration of said five year period until such thirty days' prior written notice is given by either party to the other. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

3. The Subscriber hereby authorizes and empowers the Contractor, its agents or assigns, to install and maintain the aforesaid system in said premises and to inspect, test and repair it, and, further, to make any changes in or alterations to the system made at the request of the Subscriber or made necessary by any changes in the Subscriber's premises, property or equipment, after the original installation has been completed, at the cost of the Subscriber. The Subscriber agrees to furnish any necessary electric current through the Subscriber's meter and at the Subscriber's own expense. It is mutually agreed that the work of installation and the Contractor's periodic inspections and tests of the system shall be performed between the hours of 8 o'clock, A.M., and 5 o'clock, P.M., exclusive of Saturdays, Sundays and holidays.

4. It is understood and agreed that the Contractor may remove or upon written notice to the Subscriber abandon said system, in whole or in part, including all devices, instruments, appliances, and all connections, wires, conduits, tubing, foils, screens, cabinets, springs and any other materials associated therewith, upon termination of this agreement by lapse of time, default in the payment of any moneys due hereunder, or otherwise, without any obligation to repair or redecorate any portion of the Subscriber's premises upon removal of the Contractor's system, and that the removal or abandonment of the system as aforesaid shall not be held to constitute a waiver of the right of the Contractor to collect any charges which have accrued or may accrue hereunder.

5. The Subscriber hereby agrees that the Contractor shall have the right to increase or decrease the annual charge provided for herein at any time or times after the expiration of one year from the date such system is operative under this agreement or after one year from the effective date of this agreement if an effective date is herein specified, upon giving the Subscriber written notice sixty days in advance of the effective date of such increase or decrease, and if the Subscriber is unwilling to pay any such increased charge, the Subscriber may cancel the then unexpired term of this agreement by notifying the Contractor in writing thirty days prior to the otherwise effective date of any such increase. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

6. This agreement may be terminated at the option of the Contractor at any time in the event that the Contractor is unable either to secure or retain the connections or privileges necessary for the transmission of signals by means of conductors between the Subscriber's premises and such remote stations, if any, specified on the reverse side hereof, and the Contractor shall not be liable for any damages or subject to any penalty as a result of such termination. Any advance payments made for service to be supplied subsequent to the date of such termination shall be refunded to the Subscriber.

7. It is understood and agreed that the Contractor's obligation relates to the maintenance solely of the specified protective signaling system, and that the Contractor is in no way obligated to maintain, repair, service, replace, operate or assure the operation of the property, system or any device or devices of the Subscriber or of others to which the Contractor's said system is attached.

8. It is agreed by and between the parties hereto: that the Contractor is not an insurer; that the payments hereinbefore named are based solely on the value of the services provided for herein; that, from the nature of the services to be rendered, it is impracticable and extremely difficult to fix the actual damages, if any, which may proximately result from a failure on the part of the Contractor to perform any of its obligations hereunder; that, in case of the failure of the Contractor to perform any of its obligations hereunder, and a resulting loss to the Subscriber, the Contractor's liability hereunder shall be limited to and fixed at a sum equal to ten percent of the annual service charge, hereinabove provided for, but in no event amounting to less than the sum of fifty dollars, as liquidated damages, and not as a penalty, and this liability shall be exclusive.

9. The Contractor assumes no liability for delays in installation of the equipment, or for interruptions of service due to strikes, riots, floods, fires, acts of God or any cause beyond the control of the Contractor, and will not be required to supply service to the Subscriber while interruption of service due to any such cause shall continue.

10. This agreement is not assignable by either party except upon the written consent of the other party first being obtained.

11. This agreement is not binding unless approved in writing by an authorized representative of the Company described above as the Contractor. In the event of failure of approval, as aforesaid, the only liability of the Contractor shall be to return to the Subscriber the amount, if any, paid to the Contractor upon the signing of this agreement.

12. There are no verbal understandings changing or modifying any of the terms of this agreement.

LOCAL ALARM SERVICE
(CUSTOMER OWNED SYSTEM)

THIS AGREEMENT made this..... day of....., by and between .....

hereinafter called the "Contractor", and.....,
hereinafter called the "Subscriber",

WITNESSETH: that for the considerations and covenants hereinafter specified, the parties hereto do, for themselves, their successors and assigns, mutually covenant and agree as follows:

1. The Contractor agrees to furnish and install or cause to be furnished and installed, in a good and workmanlike manner in the premises of the Subscriber, at.....

in the City of.....State of .....
a Local Alarm system as specified in the schedule on the reverse side hereof.

2. The Contractor agrees to make complete.....inspections of the system during the period this agreement shall remain in force. As a part of such inspections and at the time such inspections are made, the Contractor will make all required adjustments of the apparatus necessary for its proper operation, and will advise the Subscriber of any maintenance or repairs necessary to the system, but it is understood and agreed that all maintenance, repairs, replacements of worn out or damaged devices or materials, and any changes in or alterations to the system made at the request of the Subscriber or made necessary by any changes in the Subscriber's premises, property or equipment, after the original installation has been completed, shall be made at the cost of the Subscriber. It is mutually understood and agreed by and between the parties hereto that whenever the Local Alarm system specified in the schedule on the reverse side hereof shall require attention by a representative of the Contractor, whether for repairs, maintenance, nonfunctioning, malfunctioning or any cause whatsoever, the Contractor shall have a period of twenty-four hours from and after the time of receiving written notice from the Subscriber of the need to give attention to said system, within which to dispatch a representative of the Contractor to the premises of the Subscriber.

3. The Contractor hereby guarantees all materials and workmanship against any defects for a period of one year from the date of completion of the installation.

4. The Subscriber agrees to pay to the Contractor, its agents or assigns, the sum of.....

.....

($.....), one-half to be paid upon signing of this agreement and one-half to be paid upon completion of installation of the said Local Alarm system. Upon payment of the entire amount hereinabove specified, but not before, the entire equipment shall become the property of the Subscriber.

5. The Subscriber agrees to pay to the Contractor, in addition to the aforementioned amount, for the inspection service hereinabove described to be furnished by the Contractor, the sum of.....

($.....), per annum, annually in advance, for the period of five years from the date such system is installed and operative under this agreement, and, thereafter, to pay the said sum per annum, annually in advance, until the termination of this agreement, which is terminable at the end of said five year period, provided thirty days' prior notice in writing of desire to terminate is given by either party to the other; otherwise to continue after expiration of said five year period until such thirty days' prior written notice is given by either party to the other.

6. The Subscriber agrees that the Contractor, its agents or assigns, and no others, shall be permitted to make inspections, repairs or replacements or in any way to alter or modify the system and that no apparatus or device shall be attached to or connected with said system without the knowledge and consent of the Contractor and if the Subscriber shall violate any provision contained in this clause, the Contractor shall have the right to cancel this agreement and be released and discharged from any and all obligations hereunder. It is mutually agreed that the work of installation and the Contractor's periodic inspections and tests of the system shall be performed only between the hours of 8 o'clock, A.M., and 5 o'clock, P.M., exclusive of Saturdays, Sundays and holidays.

7. It is understood and agreed that in default of payment of any sum due to the Contractor by the Subscriber for the installation of this system, as herein stated, this agreement shall become null and void upon written notice by the Contractor to the Subscriber and the Contractor may remove all devices and materials furnished and installed and the Subscriber will permit such removal.

8. It is further understood and agreed that in default of payment of any sum due to the Contractor by the Subscriber for the inspection service herein provided for, this agreement shall become null and void upon written notice by the Contractor to the Subscriber.

9. It is further understood and agreed by the parties hereto that neither one nor both of the happenings provided for in the two paragraphs next above shall be held to constitute a waiver of the rights of the Contractor to collect any sum or sums which may then be due under this agreement.

10. The Subscriber hereby agrees that the Contractor shall have the right to increase or decrease the annual charge provided for herein at any time or times after the expiration of one year from the date such system is operative under this agreement or after one year from the effective date of this agreement if an effective date is herein specified, upon giving the Subscriber written notice sixty days in advance of the effective date of such increase or decrease, and if the Subscriber is unwilling to pay any such increased charge, the Subscriber may cancel the then unexpired term of this agreement by notifying the Contractor in writing thirty days prior to the otherwise effective date of any such increase.

11. It is understood and agreed that the Contractor's obligation relates to the installation and inspection solely of the specified Local Alarm system, and that the Contractor is in no way obligated to maintain, repair, inspect, service, replace, operate or assure the operation of the property, system or any device or devices of the Subscriber or of others to which the said system is attached.

12. It is agreed by and between the parties hereto: that the Contractor is not an insurer; that the payments hereinbefore named are based solely on the value of the devices and materials installed and of the service to be performed in the inspection of the system described; that, from the nature of the service to be rendered, it is impracticable and extremely difficult to fix the actual damages, if any, which may proximately result from a failure on the part of the Contractor to perform any of its obligations hereunder; that, in case of the failure of the Contractor to perform any of its obligations hereunder, and a resulting loss to the Subscriber, the Contractor's liability hereunder shall be limited to and fixed at a sum equal to twenty-five percent of the annual service charge, hereinabove provided for, as liquidated damages, and not as a penalty, and this liability shall be exclusive.

13. The Contractor assumes no liability for delays in installation of the equipment, or for interruptions of service due to strikes, riots, floods, fires, acts of God or any cause beyond the control of the Contractor, and will not be required to supply service to the Subscriber while interruption of service due to any such cause shall continue.

14. This agreement is not assignable by the Subscriber except upon the written consent of the Contractor first being obtained.

15. This agreement is not binding unless approved in writing by an authorized representative of the Company described above as the Contractor. In the event of failure of approval, as aforesaid, the only liability of the Contractor shall be to return to the Subscriber the amount, if any, paid to the Contractor upon signing of this agreement.

16. There are no verbal understandings changing or modifying any of the terms of this agreement.

Re: Acquisition of General Alarm Corporation by American District Telegraph Company of Massachusetts

Dear Mr. Fritz:

This is in reply to your request for the views of the Department regarding the proposed acquisition of the General Alarm Corporation by American District Telegraph Company of Massachusetts.

On the basis of the information you have submitted and the representations of the parties involved, the Department does not presently intend to take action with respect to the proposed acquisition. It is understood, however, that the Department reserves the right to take action in the future if other evidence or subsequent developments should warrant it.

Your submission of this proposal for our consideration prior to its consummation is greatly appreciated.

Sincerely yours, Stanley N. Barnes, Assistant Attorney General, Antitrust Division.

DEFENDANTS' EXHIBIT Z-1

Mr. Schultz 8/17
Mr. A. Gaston 8/17
Mr. Concannon FX 8/17

Mr. O'Brien requests that you review—note—and return. 8/17/60 (Handwritten)

August 16, 1960.

July 29, 1960.

Mr. J. A. MacDonald
First Vice President

Pricing Policy

It is not within the province of the Sales Department or the General Sales Manager to comment upon the depreciation practices adopted by the Company, nor to comment upon expenditures in general, as related to prices. However, it is well within the sales function to state—as reasonably and accurately as possible—why additional increases to our current MBR would, in our judgment, be detrimental to sales.

The General Sales Manager has consulted with all members of his staff, and the following represents the sum of Sales Department thinking on pricing. In essence, we believe that an attitude of extreme caution should immediately be taken relative to further price increases.

First, it should clearly be understood that it is not only competitive activity and pricing that is causing us to lose business, but also the high level of our prices over the past few years. Many former customers have cancelled ADT contracts, not because they have been lured by lower competitive prices, but because *our* prices had become too high for the budgets they could justifiably allot to electric property protection. This is particularly true in the case of the smaller, downtown mercantile establishments which almost never realize payroll savings from our installations, and but negligible insurance benefits. It is accurate to state that small mercantile Burglar Alarm accounts have dimin-

ished alarmingly since World War II, and that we can no longer consider this as one of our prime markets, *as we could in previous years.* Even large mercantile accounts have decided to discontinue ADT service because of price, many of them contracting with competitive firms for central station services at lower rates, others deciding to use proprietary protection devices, or watchmen only.

In this connection, our largest mercantile account, Sears, Roebuck and Co., has repeatedly warned us in recent years of their increasing alarm about the steady increases in our [fol. 5573] service charges. Through the years, our handling of this account, primarily by Vice President A. E. Smith, has resulted in an enviable relationship with purchasing and administrative officials, who have been able to protect us from others in Sears who look with disfavor on our pricing policies. The best talent in the Sales Department has been enlisted in maintaining this excellent relationship.

But our relations, however friendly, can no longer be depended upon to prevent Sears from analyzing our prices to our disadvantage. Sears has outlined for action in the near future a new policy requiring competitive bids on *all business including renewals,* with the proviso that bids will be awarded to the bidder whose charges will be lowest. We have been reliably informed that this policy is the direct result of ADT price increases. Following is the instruction that soon will be sent to *all* Sears officials involved in contracting for automatic protection services:

> Purchase of Electrical Alarm Equipment and Services
>
> A. *Where more than one qualified company is available, D/824 Terr. should obtain at least two sealed competitive bids before entering into a new or renewal contract for electrical alarm equipment.* Except in central station locations, at least one bid should involve the outright purchase of alarm equipment plus installation and continuing maintenance of the equipment. The Territorial Security Manager will assist D/824 Terr. in obtaining competitive bids. *All bids should be evaluated in terms of total cost (including any installation charges and probable increases in service charges) over a ten-year period.*

To illustrate the dangers that beset us *just with this one large account,* consider the fact that in the City of Chicago only, Sears and its affiliates, DeSoto Chemical Coatings, Inc., and the David Bradley Manufacturing Works, now have contracts with us in the annual amount of $101,713. Virtually all of these contracts were at standard rates when originally negotiated. Certainly our major competitor in Chicago will be called upon to submit bids when these contracts come up for renewal. His quotations are consistently lower than ours, particularly on large sprinkler installations, and there seems to be virtually no doubt that *we will lose a large share of these contracts even if we hold to present rates,* when they come up for renewal. And this reference is only to Sears, Chicago. We expect that in the near future close to $1,500,000 of Sears' accounts will be opened up for competitive bids.

[fol. 5573a] Another current mercantile case in point is Broadway-Hale Stores, Inc. of Los Angeles and San Francisco, to whom we render service at some 20 large department stores, for an annual service charge of over $50,000. We have been advised that their new policy is to request competitive bids on all renewals and to award the agreement to the bidder who is lowest over the five-year period. They told us that this policy was adopted to prevent us from constantly increasing our rates.

Our price problem is not, of course, limited to the mercantile classification. Contracts in ever-increasing number are being processed where the charges, either annual or advance, or both are below our minimum basic charges. The explanation given in practically every case concerns the subscriber's inability or unwillingness to pay more than the charges obtained.

Were such cases limited to a few salesmen, or a few districts, weak sales ability might be involved. But such is not the case, for sub-basic contracts are received from all areas, competitive and noncompetitive alike; from experienced, capable, and acquisitive salesmen who do not lightly submit contracts at low prices and consequently lower commissions. They are passed to us with the recommendations of district sales managers who are Company-minded, intelligent and equally acquisitive, not because of weak sales

management techniques, but *just because they know this is the best we could do on price.*

The pattern of general price resistance is considerable. With every passing year, it has become more widespread and more difficult for our field forces, however conscientious and talented, to combat. *Even with drastic deficiencies in price offerings, many new jobs have been impossible to secure.*

Our experience shows that more and more contracts are being renewed at the same annual service charges, or with increases that leave them below MER, despite incentive commission payments that are offered for even less than standard increases. Even during sales campaigns, when every contract dollar contributes even more to a salesman's incentive pay, the pattern of sub-basic renewals and sub-basic new contracts is unchanged. There is absolutely no question about it; our present prices are a barrier to many sales, and to many renewals.

[fol. 5574] To this point nothing except passing reference has been made to the problem of competition and competitive pricing. It is a startling fact that we have some 900 known competitors. Many are small local burglar alarm companies; some are firms specializing in proprietary services; some in direct-connected services. Some operate through telephone-answering services, others through unlisted substandard central stations and others, the major competitive organizations, operate through approved central stations *having the same insurance recognition as our own.* These last are increasing in number, and offer practically the same kind and quality of service that we do.

A new competitor in the electric protective signaling field, Minneapolis-Honeywell, should be viewed as a most serious threat to us, on a nationwide basis. At the present time, this firm is making experimental inroads, on a proprietary basis. We in sales have documented evidence that Executive Account subscribers are even now being approached by Minneapolis-Honeywell, and that a concerted drive to interest national concerns in Minneapolis-Honeywell service is, or soon will be, underway. Some jobs have already been lost to Minneapolis-Honeywell in this connection, among others Schenley Distillers, Inc., Schen-

ley, Pa., Bullard Company, Bridgeport, Conn., and Chicago Art Institute.

With regard to national users, it has been apparent for some time that we simply cannot go on living with the situation of price disparities between large and small subscribers, for the very sound reason that, at long last, our large users are becoming aware of such disparities. Sears, Montgomery Ward, McKesson & Robbins, and scores of other large accounts are at this time advising our three New York Executive Account salesmen, and special representatives who have district national accounts in the field, that they can no longer continue to accept our rate increases. In many instances, accounts that for years agreed without a qualm to contract with us at standard prices, now demand lower prices, or have adopted a policy of requiring sealed competitive bids before making a buying decision. Some of these accounts include Western Electric, Schenley's, American Can, Continental Can, Federated Department Stores, Allied Stores, Associated Dry Goods, New York Central System, Olin Mathieson, Joseph E. Seagram & Sons, Ralston Purina, Allis Chalmers, Gimbel Bros., J. C. Penney Company, General Foods, etc.

[fol. 5575] A recent report on McKesson & Robbins, Inc., by Senior Executive Accounts Representative H. B. Schultz contained this statement:

> "My contact, Mr. Goodwin, Vice President, is the best possible that one may have. It is on a completely personal basis. However, he told me that their Executive Vice President, Mr. Sutherland, called him on the carpet recently and criticized him, because he did not secure competitive bids. Mr. Sutherland feels that, since we are the only national organization in the business, our rates are much higher than need be and I am afraid that from here on I will experience more and more difficulty in handling this account."

Our second largest national user is the U. S. Government, where the same situation prevails. Where possible, our Government and Special Sales Division attempts to secure Government service business on a negotiated basis, rather than on a competitive bid basis, thereby permitting us to keep Government service rates as near MBR as possible.

More and more often, however, Government officials are requiring competitive bids, and our prices are all too often the highest submitted by three or more bidders.

As far as Outright Sales, both Government and commercial are concerned, there is even more competitive growth than in central station sales. Practically *every* transaction in this field is competitive, whereas central station competition is, of course, limited only to those areas (60% of our market) where central station competitors are in business.

As far as Government outright sales are concerned, during and immediately after World War II, ADT enjoyed a favored position in the Government fire alarm field, because much of the construction was of a temporary nature requiring automatic fire alarm systems. We got a major share of the business, primarily because of our ability to supply. In the post-war period, competition became more pronounced in the fire alarm field of Government sales and Government specifications followed trends not always favorable to ADT. Today we do practically no fire alarm business with the Government. We are just not competitive in price, and the jobs *all* go to the lowest bidder who otherwise meets specifications.

[fol. 5576] During the past several years, our annual outright sales have exceeded $1,000,000, 75% of this total being in the Government security alarm (burglar alarm) field. An insidious parallel can be drawn between this part of our Government sales program and the decline in our outright sales of fire alarm systems to Government already noted.

With the advent of the Government Internal Security Program in 1948, our Government Relations Department was able—by assidious cultivation of Government officials, and because we were able to supply approved security alarm systems—to secure for ADT a favored position. Although we are still strong in this Government market, more and more competitors—such as Mosler Research Products, Diebold Safe and Lock, Minneapolis-Honeywell, etc.—have developed security systems that satisfy Government specifications. With pressure by these competitors for open specifications and bidding, Government security sales are becoming more and more a matter of price. Our Government sales specialists believe it would be most unwise for

us to increase our present rates, as a matter of fact, they feel that as time goes on, even our present standard of price will be extremely injurious to our efforts with Government.

Our field personnel almost universally evince a deep concern with this matter of price.

First, as stated previously, it is becoming ever more difficult to justify our rates when competitors offer service *equally satisfactory to rating boards and other insurance interests* at prices considerably below our own. The average customer, experience proves, can be convinced of the superiority of our service by our salesmen, and in some cases will pay up to 10% more for that difference in quality. But 20%, 30%, 40%, 50%, such differentials cannot be obviated by sales argument as to a better grade of service, quality control, more frequent inspection and maintenance, and the like.

Even where payroll savings are involved, the disproportion in price is harmful. Certainly the money-saving appeal is important to the customer. If a firm can save the payroll costs of three watchmen (say $20,000 a year) by contracting with ADT for an automatic protection installation at [fol. 5577] $10,000 per year, he has a clear saving of $10,000. But if a competitor offers the same type of *approved* service at $8,000 annually, the customer can now realize an economy of $12,000. So, our stepped-up prices cannot always be justified; actually, competitors like Minneapolis-Honeywell are climbing on the payroll-savings bandwagon, for they too know a good thing when they see it.

Another selling problem created by high price is the *closing gap* between the price of ADT services and the payroll costs they are instituted to save. Whereas in former years, huge amounts could be saved, today our prices are rising much faster than are the costs of watchmen. Because watchmen can be assigned additional duties, it is often not feasible to discontinue using them unless the savings afforded are really substantial. As our prices increase, it thus becomes more and more difficult to bring about the large savings that have been possible in the past.

Our prices have a deleterious effect on other sales techniques as well. For example, it is true that the assistance of the insurance interests can be of inestimable value to

our sales efforts. Many hundreds of automatic protection installations have been negotiated because an insurance broker recommended ADT. This, of course, will continue to be so.

But it is also a fact that insurance brokers often are in competition, too. If they can propose a package of insurance plus protection to an account at a *saving* over a similar package proposed by another broker, it is usually academic for the account to decide which broker to use—the one who offers the best deal from the standpoint of economy.

Thus, high ADT prices can impede the success of a broker in landing accounts, and no matter how we have cultivated his friendship, nor how high a regard he has for the quality of our service, ultimately he will be forced to listen to the ADT competitor and his story of equal protection at lower cost. This, unfortunately, is happening more often. Undoubtedly, further rate increases can be expected to invite additional broker discontent in ADT.

[fol. 5578] A second deep concern is voiced by our field personnel, namely, the impact of our price levels on earnings and morale. A recent report from Mr. Ray Brechbill is enlightening in this regard:

> "Recently in the Cleveland District, I returned a Dayton contract with the hope that it could be improved modestly. Our Sales Representative, Bill Clark, *tried to improve the contract and in so doing lost the business to the competitor.* Bill Clark has been with us about two and one-half years. He is one of the more promising young men that I have seen hired in recent years in my region. He did an outstanding job in Cleveland and is doing a very outstanding job in Dayton. Already both the Dayton competitor and Morse in Cleveland have made some overtures to him. We simply must stay in the market at Dayton as well as in all other areas, if we are to retain these fine young men.
>
> "A case at point in this connection would be Mr. Balestrino in Cincinnati. In spite of a modest concession in commissions for him and the other Cincinnati men, thus far, he is earning this year substantially less than

he has been earning for over four years. I know he is working equally as hard or harder than he has worked in many years, yet with diminishing earnings due to the competitive situation in Cincinnati. Our competitor in Cincinnati is quoting consistently the equivalent of 50% or less than our MBR. A price increase for this city and many other similar ones, it seems to me, would be utterly out of the question."

The foregoing deals, to some degree with factual cases. Literally hundreds of case histories of jobs lost because of high price are in Sales Department files, available for study at any time.

It is the firm recommendation of the General Sales Manager that decision on further increases be weighed most carefully. While rising costs might call for such action, it is our conviction that price increases will, in the long run, be detrimental to over-all Company interests. We believe that almost any alternative to meet rising costs would be preferable to increasing our minimum basic service charges.

L. J. O'Brien, General Sales Manager.

CFC

In addition to those listed above a copy of this letter was given to the following: Mr. Hannon—Mr. Simon—Mr. Halpin — Mr. Straus — Mr. Brechbill — Mr. Bodley — Mr. Maxey—Mr. Caffrey—Mr. Carr—Mr. Young.

Mr. O'Brien advises that at the Board meeting on 8/18/60 copies of this letter and Mr. MacDonald's letter of July 29, 1960 were given to the members of the Board of Directors. 8/19/60 (Handwritten)

[fol. 5579] CLERK'S NOTE:

Memorandum from ADT Special Representative J. R. Norris to ADT Commercial Superintendent C. L. Chafee, Captioned National Can Corp., Cleveland, Ohio, dated July 23, 1954 is omitted from the record here. It is being printed as Government Exhibit No. 257, page 2878 supra.

[fol. 5580] IN THE UNITED STATES DISTRICT COURT

DEFENDANTS' EXHIBIT LL

PRICE WATERHOUSE & Co.
60 Broad Street
New York 10004

May 27, 1964.

The Board of Directors
American District Telegraph Company (N. J.)
New York, N. Y.

and

Bleakley, Platt, Schmidt, Hart & Fritz
New York, N. Y.

Dear Sirs:

We have been the independent accountants for American District Telegraph Company (N. J.) for more than fifty years. In this capacity, we examined in accordance with generally accepted auditing standards the consolidated financial statements of American District Telegraph Company (N. J.) for the year 1962 and expressed our opinion thereon, dated February 26, 1963, that such statements presented fairly the consolidated financial position of American District Telegraph Company (N. J.) and its controlled companies and the results of their operations for the year, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

In examining the consolidated financial statements, we have for a number of years performed the audit function at ADT accounting centers in the larger cities. This service encompasses tests of the accounting records of the center and its dependent offices relating to advance and annual service charge billings and receivables, payrolls and other disbursements.

We were asked recently by officers of the American District Telegraph Company to review the reconstructed operating results for 1962 of the 27 individual central stations mentioned on pages 19 and 20 of the Brief of Defendant Alarm Companies with Respect to Relief, filed

with the United States District Court for the District of Rhode Island, in the case of United States of America v. Grinnell Corporation, American District Telegraph Company, Holmes Electric Protective Company and Automatic Fire Alarm Company of Delaware (Civil Action 2785). Our review included tests of the reasonableness of the methods used by the company in determining operating results for individual central stations and in adjusting such results to reflect the effect on the 27 central stations of the proposed divestiture of contracts amounting to $125,000 of annual service charges. Our tests included the agreement of the results of operations of the central stations with the consolidated financial statements for the year [fol. 5581] 1962 and a check of the mathematical accuracy of the adjustments made to the operating results of the 27 central stations. Slight revisions were made to the methods of adjustment subsequent to the filing of the brief and such revisions resulted in operating losses for 5 of the central stations, profits after federal income tax of less than 4 per cent of revenue for 9 central stations and profits after federal income tax in excess of 5 per cent of revenue for 13 central stations. The 27 central stations are listed in Appendix A.

For the purposes of the conclusions to which this narrative leads, it seems essential to outline briefly the nature of the ADT system organization, its accounting practices and the techniques used to adjust the operating results for the 27 central stations.

ADT operates 121 central stations, each of which has its own labor force for the sale and supply of central station protection services. All management and supervisory functions are performed either from the headquarters offices situated in New York City or through local points of supervision (13 in number) strategically located throughout the country. The system organization has only one set of officers; only one accounting department, which undertakes the consolidation of all local accounts and prepares the financial statements; and only one tax department, which reviews audits and pays all taxes whether of local, state or federal origin.

For each of the central stations, separate accounts are utilized for the recording of revenue and locally incurred

expenses such as labor, rent, light, heat and power. These separate accounts have been consistently maintained since 1913. Expenses incurred by the administrative and supervisory departments located in New York City and in the 13 regional offices are not charged directly to the individual central stations but rather are recorded in the accounts of the parent company (American District Telegraph Company (N. J.)).

Since early in the 1920's ADT has prepared individual income and expense statements (Form 396) for each of the central stations. In addition to the revenue earned and expenses incurred, which are directly recorded in accounts for each of the central stations, ADT, in order to develop a realistic net income from operations for each of the central stations, allocates the "general," "research & experimental," and "plant supervision" costs incurred in New York City and the regional offices to individual central stations in accordance with formula deemed appropriate and long employed. The resulting statements of revenue and expenses for each of the central stations, in addition to being used for statistical purposes, have served as the basis for company management decisions since the 1920's. It is these statements that were reconstructed by ADT in an effort to determine those central stations which could sustain revenue divestitures of the order sought by the Plaintiff.

[fol. 5582] To examine the effect of the proposed divestitures, ADT first prepared a list of all central station cities having annual service charges in excess of $250,000 and within which there existed no independent competing company supplying central station electric protection services. This list encompassed the cties embraced in the Plaintiff's 48 Appendix A cities, less 21 in which competing central station service is available (Defendants' Brief, Page 16). Starting with its detailed 1962 statements of revenue and expenses for the 27 central stations, ADT reconstructed these to show the results of operation, assuming divestitures of $125,000 in annual service charges for each of the cities in question.

In consequence of such assumed divestitures of annual service charges, it became necessary to consider the effect upon advance service charges. As shown on page 34 of the

Defendants' Alarm Companies' Brief, ADT has two sources of revenue: annual service charges and advance service charges. The former are recorded as income monthly on a straight-line basis over the term of the contract, whether it be the original or renewal contract; the latter are recorded as income monthly on a straight-line basis only over the term of the original contract, ordinarily a five-year period. Not knowing the individual contracts which would be divested but recognizing that for contracts sold to competitors the uncollected portion of advance service charges would probably not be realized by ADT and that for collected advance service charges a reduction in the sales price of the contract would probably have to be made, advance service charge income was reduced in the same proportion as the $125,000 divestiture of annual service charges bore to the 1962 annual service charge income before divestiture.

In the reconstruction of expenses ADT analyzed the effect of the loss of revenue on the various items of expense and determined appropriate methods of adjusting them. The various expense categories are listed below with a description of the applicable methods of adjustment. The alphabetic reference to the groupings below is the same as used in Appendices B and C to denote the method of adjustment to the statements of revenue and expenses for 2 of the 27 central stations, which statements are furnished as examples of the reconstructions made by ADT.

A. Inspection—direct labor, repairs—direct labor, repairs material, power, wire rentals, taxes other than federal income tax, damage claims and legal expense, depreciation, salvage material junked, sprinkler supervisory and waterflow alarm actuating devices (SS & WF Act. Dev., Inst. Pur.):

ADT reasoned that these expenses should be reduced in direct proportion to the reduction in annual service charges [fol. 5583] since by and large these expenses tend to vary directly with changes in annual service charges. The remaining portion of the expense captioned SS & WF Act. Dev. Inst. Pur., which consists of the instalment payments made by ADT to Grinnell Corporation for sprinkler supervisory and waterflow alarm devices purchased from that

company, was considered to represent, approximately, the annual effect of the commuted payments payable in instalments to Grinnell (Paragraph VI (B) of Defendants' Proposed Form of Judgment).

B. Miscellaneous expense, telephone and telegraph, vehicle expense, postage, stationery:

Knowing from statistical analyses that these expenses seem most closely relatable to the size of the office (measured by revenue and number of subscribers) ADT determined the approximate size of the 27 central stations (measured by revenue and number of subscribers) after divestiture and, utilizing its long-employed groupings of offices by size, adjusted these expenses to an amount approximating the average for a central station of the reduced size. For central stations not significantly affected in size by the divestiture these expenses were reduced by the average percentage reduction made for the other offices. By this method these expenses were reduced for all 27 central stations.

C. Pay of other service personnel:

One of the historic and statistical facts in supplying electric protection services is that pay of other service personnel does not increase in proportion to the increase in the number of subscribers served except in the very large offices. This is caused by more effective utilization of the stand-by time of personnel as volume increases.

Utilizing the size grouping described in B. above and statistical data, which has been prepared for many years, as to the hours of service incurred per subscriber, ADT reduced this expense in the same proportion as the lost revenue bore to the revenue before divestiture, adjusted for the less efficient utilization of personnel ordinarily encountered in central stations of the reduced size.

This method has resulted in a reduction consistent with the historical and statistical fact that there is a fixed element in this cost and that the expense only varies directly [fol. 5584] with revenue in the large offices. For the largest central station affected by the proposed divestiture, the percentage reduction in this expense is the same as the

percentage reduction in annual service charges, and for the other offices the percentage reduction in this expense is less than the percentage reduction in annual service charges.

D. Plant supervision:

ADT determined on a system-wide basis that 55 per cent of this expense represented locally incurred costs and 45 per cent represented the allocated regional and New York plant supervisory costs. Recognizing that the locally incurred portion of this expense probably varies directly with revenue, 55 per cent of this expense for each of the 27 central stations was reduced by the percentage reduction in annual service charges caused by divestiture.

E. Social security:

This expense was reduced by 4 per cent of the sum of the reduction in "Pay of Other Service Personnel," "Inspection — Direct Labor," "Repairs — Direct Labor" and "Plant Supervision."

F. AFP contract cost:

Contract settlement charges growing out of termination of a contract relationship with the Automatic Fire Protection Company in 1949 (Defendant Alarm Companies' Brief, Page 9) were removed from the 1962 expenditures and added back to net profit, by reason of the fact that such contract payments have been terminated.

G. Sales overhead, plant supervision (overhead), general overhead, research and experimental expenses:

Although no reduction in these expenses is anticipated, these regional and New York expenses were reallocated among all 121 central stations on the basis of the reconstructed results of operations and the effect of such reallocation has been included in the adjustments to the operations of the 27 central stations.

H. Sales expense (other than overhead), pay of managers, pay of bookkeeping personnel, rent and house service, register paper:

The company assumed that it could not make any cost reductions by reason of divestiture since these costs under the ADT method of operation would not be affected by the [fol. 5585] lost revenue. Each of the 27 central stations would still need its present sales force, manager and physical facilities. Since most of the accounting operations have been regionalized in field accounting offices to minimize costs, the Defendant's proposed divestiture would not reduce these costs. Accordingly, these expenses were not adjusted in the reconstruction of the 1962 operating results.

* * * * * * *

Our review indicates that the methods used by the company in determining the effect of the divestiture of contracts amounting to $125,000 in annual service charges in each of the 27 cities are reasonable and are in accordance with sound cost accounting practices and that the adjusted results of the 27 central stations listed in Appendix A are mathematically correct.

Yours very truly, Price Waterhouse & Co.

[fol. 5627] Key to Adjustments to Forms 396—1962

A—No change.
B—Reduce by % reduction in ANSC.
C—Reduce by % decrease in group costs for each item.
D—Reduce by % reduction in ANSC and multiply balance by % increase in group costs.
E—Reduce by an amount equal to the % reduction in ANSC applied to 55% of Plant Supervision.
F—Reduce by 4% of the sum of the savings in Pay of Other Service Personnel, Inspection Direct Labor, Repairs Direct Labor and Plant Supervision.

[fol. 5628]

Statistics re nature

[fol. 5647] This statement is statistical in nature and was not employed for any purpose in the preparation of brief filed with the Court.

It shows the approximate amount of unaccrued advance service charges applying to C.S. services at 12/31/62, with respect of which ADT has not yet paid Federal Income Tax.

Under threat of title surrender, it was reasoned that advance service charge accruals would "dry-up" leaving to ADT only the doubtful privilege of paying the Federal Income Tax on these unaccrued revenue balances.

Index 15

[fol. 5705] IN THE UNITED STATES DISTRICT COURT

DEFENDANTS' EXHIBIT SS

Memorandum for File

Substance of discussion with representatives of the Grinnell Corporation at the offices of that Corporation, in Providence, Rhode Island, on Monday, June 16, 1952

There were present at the discussion Messrs. Fleming, Clapp and Rison for the Grinnell Corporation and Messrs. Gaston and MacDonald for ADT.

Mr. Gaston opened the discussion by apologizing for our seeming delay in resuming the discussions, explaining that this was due, in principal part, to the necessity for conducting extensive studies and for engaging in extensive talks with our associates, both legal and financial. Mr. Gaston said that all of our computations indicated that on the merits of all of the equities involved, Grinnell appears to be entitled to not in excess of 12½% participation in SS & WF receipts. However, said Mr. Gaston, in recognition of the many intangible elements involved and with a sincere desire to bring to satisfactory conclusion these negotiations which have been going on so long, he would be willing to recommend Grinnell's participation as equal to 15% of gross SS & WF receipts from contracts in service at February 8, 1954 on a fixed basis, following closely the pattern of the principle agreed upon at our last meeting.

In response, Mr. Fleming said that he would like to read to us a memorandum prepared by Mr. Roger Clapp setting forth what Grinnell believed to represent its legal position under the 1907 agreement. Mr. Fleming remarked that Mr. Clapp and himself had been giving a good deal of thought to this question since we last met, and had sought the legal opinion of an independent attorney by the name of Claude R. Branch. Mr. Clapp's memorandum, said Mr. Fleming, sets out Grinnell's legal position as Grinnell now sees it, the memorandum bearing the full endorsement of Mr. Branch.

Under this latest presentation of what Grinnell conceives to be its legal position, the 1907 agreement constituted

something of a joint venture in the nature of a partnership. The agreement is silent as to the terminal equities of the "partnership" corporations. Messrs. Clapp and Branch now feel that in the absence of a specification of terminal rights, each party to the 1907 agreement fell under obligation to continue to contribute to the joint venture, beyond the terminal date of the 1907 agreement, the materials and services which was its special undertaking under the 1907 agreement, with respect of contracts entered into with subscribers during the stated duration of the 1907 agreement. The attorneys are unanimous in the opinion that, following February 18, 1954 contracts with new subscribers need not be brought under the 1907 agreement. In other words, the 1907 agreement terminates on 2/18/54, except with respect of arrangements with subscribers negotiated up to that date.

Mr. Clapp's memorandum, as read by Mr. Fleming, developed this thesis in rather extended fashion. For instance, Mr. Clapp made the point that except as the equities of the parties extend beyond February 18, 1954, under the theory now advanced, Grinnell would be called on to make the investment required to furnish and install actuating devices under a contract negotiated a month or two before termination of the 1907 agreement, without opportunity to derive proper recompense for such investment. That, argued Mr. Clapp, could not have been the intention of the parties. Mr. Clapp's memorandum concluded with a summary of the presentation leading to the conclusion that, legally, Grinnell was under obligation to leave in service actuating devices installed pursuant to the provisions of the 1907 agreement and in service at 2/18/54 but, in consequence, derived the right to continue to enjoy 25% participation in proceeds under such contracts as long as the equipment remained in service.

[fol. 5706] By way of comment on the reading of Mr. Clapp's memorandum, Mr. MacDonald observed that it did not seem to present much that was in any way new—that Mr. Clapp's proposal contemplated precisely the arrangement under discussion since the early part of this year, with Grinnell now suggesting that it would like to enjoy 25% participation in gross receipts in place of the 20% participation which it had already agreed to accept.

Pointing out that he was not an attorney, Mr. Gaston remarked that as far as he was concerned he had made clear his endeavor, along with Mr. Fleming, to find a practical solution to the problem facing both companies. In response, Mr. Fleming made clear that Grinnell was not asking to receive 25% participation, but simply pointing out what it felt was its legal rights under the 1907 agreement, rights which Mr. Fleming felt would be impressive to the court in the event it was found necessary to resort to the court for determination of all of the issues involved.

Mr. Fleming then brought up the question of having Grinnell purchase from ADT the actuating devices furnished and installed by the latter in replacement of those originally furnished and installed by Grinnell. In doing this, Mr. Fleming acknowledged the validity of ADT's earlier contention that it would be impracticable to have Grinnell attempt to make future replacements. In substitution of his earlier suggestions that Grinnell buy ADT's replacement devices, subsequently furnishing and installing future replacements, Mr. Fleming now suggested that Grinnell buy ADT's replacement devices in service at 2/18/54, supply ADT with actuating devices to be used for future replacements, ADT, however, to supply the labor necessary for replacement.

In response, Mr. Gaston indicated that he thought it might be practical to work out some future arrangement, subject to approval of our attorneys and with the understanding that the arrangement would obtain with respect of installations in service at 2/18/54, only. Mr. Gaston suggested that it probably would not be necessary to ask Grinnell to equip all ADT storerooms with replacement devices, indicating that it might suffice if Grinnell were to provide stocks of replacement devices at 20 to 25 of our larger supply centers, thus making the devices reasonably promptly available where needed.

At this point, Mr. Fleming proclaimed that Grinnell was as anxious to reach some satisfactory composure of all the issues involved as ADT. In acknowledging the efforts of both parties to come to agreement on some form of contract governing continuance of participation in collections under contracts in force on 2/18/54, Mr. Fleming asked us to have regard to the almost inconceivable condition

that would prevail, at that time, in the event we found ourselves unable to agree on any appropriate continuing arrangement. Mr. Fleming then suggested that he and the Grinnell associates withdraw from the meeting for a short time.

Within ten minutes or so, the Grinnell representatives rejoined Mr. Gaston and myself and Mr. Fleming, addressing himself to Mr. MacDonald, inquired, approximately, the value of Grinnell's devices replaced by ADT. Fleming said that as he recalled it, the value originally spoken of was in the neighborhood of $535,000. Mr. Fleming was told that, having regard to the fact that the $535,000 figure was developed in about the year 1948, and having regard to ensuing price increases and property growth, the value should stand now roughly about $1,000,000.

Mr. Fleming then suggested that he would like to see Grininell pay ADT the value of these devices, to be allowed to furnish future replacements of actuating devices applicable to installations in service on 2/18/54, adhering to the 20% Grinnell participation offered at our last meeting. [fol. 5707] Mr. Gaston again referred to all of the computations we had made and all of the discussions with our financial and other associates, leading to the conviction that the measure of Grinnell's equity in the business would be well represented by something not in excess of 15% participation in gross sprinkler supervisory and waterflow alarm receipts.

Mr. Fleming inquired whether we were still talking about a 20 year agreement and Mr. Gaston responded that we would entertain the thought of a longer period if agreeable to Grinnell. Mr. Fleming remarked that he did not want to be around to go through these negotiations all over again, and indicated that a 30 year period would be agreeable to the Grinnell Corporation. Fleming reiterated his willingness to pay ADT for the Grinnell actuating devices replaced by ADT, to furnish the devices required for future replacements of 1954 installed devices and said he thought that we would not have any great difficulty in coming to agreement on some participation percentage for Grinnell lying somewhere between the 15% nominated by ADT and the 20% requested by Grinnell.

Mr. Gaston and Mr. Fleming engaged in some further

discussion regarding the number of supply stations that Grinnell might practically contemplate equipping with replacement devices. It was agreed that these would number between 20 and 25. Thereupon Mr. Fleming inquired whether Grinnell and ADT could not get together in the matter of Grinnell's continuing participation percentage.

At this point Mr. Gaston threw out an inquiry as to the particular purpose of placing a time limit on the agreement we had in mind, pointing out that whether we did it now or again in 20 or 30 years from now, what both sides undoubtedly had in mind was the necessity of entitling Grinnell to some participation in SS & WF gross receipts from installations in service on February 18, 1954, until termination of service under such installations. In manner of thinking out loud, Mr. Gaston indicated that he might be stepping into fields beyond his province and that what he had to propose was subject, of course, to approval of the Board of Directors. At all events, said Mr. Gaston, while to remove the time limit from the contract under consideration sounded like a long time, the time would quickly roll around when February 18, 1954 contracts would come to normal termination. He inquired of the Grinnell folks what they would think of removing the time limit from the contract, letting normal attrition take its course.

Mr. Fleming inquired of Mr. Clapp whether he saw any legal reason why this should not be contemplated and Mr. Clapp responded that there was no reason that occurred to him why we should not consider the arrangement. Mr. Gaston reiterated that all conclusions, on this score, were subject to the judgments of the company's legal advisors, but remarked that it seemed to him that ADT's proposal for elimination of a time limit made its 15% participation proposal that much more attractive. Mr. Fleming responded that Grinnell's offer to buy ADT's replacement devices, on the other hand, was worth something to ADT, but Mr. Gaston countered with the observation that our 15% offer contemplated that Grinnell would buy replacement devices and provide for future replacements. The only thing ADT ever had objected to, pointed out Mr. Gaston, was Grinnell's suggestion that that company make replacements, a wholly impractical arrangement, in Mr. Gaston's estimation.

At this juncture, the Grinnell representatives again withdrew from the discussion, absenting themselves for possibly fifteen minutes. On their return, Mr. Fleming pointed out to Mr. Gaston that if an agreement were to be entered into of unlimited duration, there wasn't any particular point in suggesting that Grinnell buy ADT's replacement devices or undertake future replacements. He remarked that the only thing he had in mind in suggesting these [fol. 5708] arrangements was to benefit Grinnell's position at the end of any fixed period contract.

Fleming suggested that participation in gross SS & WF receipts on the basis of a midway compromise between ADT's 15% offer and Grinnell's 20%, would be acceptable to that company. Mr. Gaston responded that participation on this basis would be agreeable to ADT only provided Grinnell were willing to go along with its offer to buy ADT's replacement devices and to undertake to make future replacements of actuating devices in connection with installations in service at 2/18/54. After a noticeable pause, Mr. Fleming indicated he would buy that deal and Mr. Fleming and Mr. Gaston shook hands on the mutually agreeable arrangements.

Mr. Clapp inquired whether we would like him to proceed to present a draft of agreement embodying his understanding of the arrangements agreed upon, but was told that we would prefer to first determine the disposition of our own attorneys in this respect. This phase of the discussion was left on the basis that Mr. Gaillard would get in touch with Mr. Clapp in coming to agreement on precisely how to proceed in working out all details of the proposed arrangements.

Mr. Gaston made clear to Mr. Fleming our desire that execution of any agreement with Grinnell was contingent upon our ability to work out, in satisfactory manner, all details of the arrangement, acceptance of the whole proposal, on the part of our legal advisors, and, of course, to approval of the Board of Directors. It was indicated further that there could be no contract settlement with Grinnell until agreement also had been reached on composure of all terminal equities involved in agreement dated April 29, 1907 between ADT and the Automatic Fire Alarm Company, affecting the cities of Boston, Greater New York and

Philadelphia. Mr. Fleming indicated that all conditions were understood and satisfactory to him, except that he would very much like to see us reach and sign agreement with Grinnell as promptly as possible, indicating that he felt it would be desirable for ADT and Grinnell to reach complete agreement on all points, before the commencement of negotiations for and on behalf of the Automatic Fire Alarm Company. His principal reason for this, said Mr. Fleming, lies in his sincere desire to engage in straightforward arms-length trading as concerns the equities of the Automatic Fire Alarm Company, because of the minority stock interest, in that company, with which he will have to deal. He feels that there would be infinitely less cause for any minority stockholders' allegation of inter-trading the equities of Grinnell and the Automatic Fire Alarm Company if the Grinnell issues were first negotiated out of the way. We told the Grinnell representatives that we would have to be guided, in this respect, by the judgments of our legal and financial associates.

We did not get too deeply into the equities of the Automatic Fire Alarm situation. Little was done except to leave the Grinnell representatives with an impression that, measured by the formula employed in arriving at the respective equities of Grinnell and ADT in the 1907 agreement, any proposal for continuing participation on the part of the Automatic Fire Alarm Company would necessitate something of a deep cut in the present participation percentage enjoyed by that company. Mr. MacDonald outlined the application of a formula which would follow, roughly, the one suggested by Grinnell for application to its own situation, which would contemplate:

1. Determination of recurring gross annual receipts from SS & WF service in the territories served by the Automatic Fire Alarm Company.
2. Subtraction from this figure of an amount representing ADT's annual recurring operating cost plus a measure of exclusive profit enjoyment related to such cost. This figure to be reached in proper regard for ADT's existing operating cost ratios.

[fol. 5709] 3. Deduction from gross annual revenues of a sum representing reimbursement for services exclusively performed by the Automatic Fire Alarm

Company, i.e., the solicitation of business, plus enjoyment of an exclusive profit based on such cost. This figure also to be reached in regard to AFA's normal solicitation expense ratios.

4. Deduct Grinnell's participation in gross annual recurring revenues, based upon the 17½% figure tentatively agreed upon.
5. The remainder of gross annual recurring service charges to be shared by ADT and AFA Companies in proportion to the investment contributions of each company.

It was made clear to the Grinnell representatives that since ADT performs the major portion of the work of supplying SS & WF service and since it supplies by far the major proportion of the investment contribution, the application of this formula, substantially the same one relied upon by Grinnell to support its own participation in the business, would not appear to entitle the Automatic Fire Alarm Company to anything in excess of 15% or 16% participation in the business.

It was agreed, however, that many aspects of this formula application would require closer examination, but agreed, also, that there was necessity to get into the matter of the Automatic Fire Alarm settlement, without undue delay.

From this point we shall have to pick up the matter of negotiations with the Automatic Fire Alarm Company principals, virtually from scratch.

J. A. MacDonald, June 17, 1952.

[fol. 5710] In the United States District Court

Defendants' Exhibit UU

Minutes of the meeting of the Board of Directors of American District Telegraph Company (New Jersey) held at 60 Hudson Street, New York, N. Y., in Room 2300, at 11:00 o'clock A. M., on Wednesday, June 11, 1952.

The following Directors were present: Messrs. Bradshaw,

Campbell, d'Humy, Gaston, Head, McMains, Marshall and Stark.

* * * * * * *

The President reported respecting negotiations with Grinnell Corporation looking toward composure of that company's reversionary rights in agreement, dated 4/29/07 which expires on February 18, 1954. The Grinnell Corporation, since 1907, has furnished and installed certain devices employed in supplying Sprinkler Supervisory and Waterflow Alarm service, for which it has received 25% of gross collections.

Based on advice of the company's attorneys, there is necessity to terminate this collaborative effort at contract expiration, but necessity, also, to discover some satisfactory manner of liquidating Grinnell's equity in the business at 2/18/54 which comes to it through the joint-venture doctrine.

ADT has agreed with Grinnell, in principle, that that Company shall be entitled to participate in gross receipts from SS & WF installations in service on 2/18/54 until termination of service under the then existing contracts or any extension or renewal thereof, but that, effective at the close o fbusiness on 2/18/54, ADT will sell, install and service SS & WF installations without assistance from Grinnell and without entitling that Company to any participation in gross collections.

Under the above tentative arrangement, Grinnell has asked for 20% participation in gross SS & WF annual service charges in force on 2/18/54. Mr. J. W. Rahde, Vice President and Mr. W. D. Gaillard, Jr. who has acted as our Attorney throughout six years of negotiations, agree that on the merits of the situation, settlement with [fol. 5711] Grinnell, at not in excess of the basis indicated, would constitute the exercise of reasonable business judgment. The offer would be subject to:

(a) the approval of this Board upon proper representation,

(b) the Company's ability to work out with Grinnell in manner satisfactory to its attorneys all details of this tentative proposal and

(c) ability to come to similar satisfactory compromise of the reversionary rights of the Automatic Fire Alarm Company in agreement also expiring on 2/18/54 and limited to the cities of Boston, Philadelphia and New York. The capital stock of the AFA Company is largely owned by Grinnell Corporation.

There being no further business to come before the meeting, on motion duly made, seconded and carried, the meeting was adjourned.

J. A. MacDonald, Secretary.

[fols. 5712-5713] IN THE UNITED STATES DISTRICT COURT

DEFENDANTS' EXHIBIT VV

The following is an excerpt from minutes of meeting of the Board of Directors of American District Telegraph Company (N. J.) held on Wednesday, July 9, 1952.

"The Chairman stated that Mr. Gaston had reported upon negotiations with the Grinnell Corporation looking toward a resolution of various problems which had arisen and would arise under agreement dated April 29, 1907 between ADT and the Grinnell Corporation, which negotiations had produced an offer on the part of Grinnell to relinquish its interest under said agreement, at expiration on February 28, 1954, in consideration of:

1. The payment, by ADT, of 17½% of gross annual sprinkler supervisory and waterflow alarm service collections derived from installations in service at 2/18/54, excluding therefrom, increases in gross annual service charges due to rate increases effected subsequently to 2/18/54, such payments to continue for the lives of such installations (Grinnell to be entitled, upon the termination of each such installation, to any devices it furnished and installed and any devices referred to in 2 and 3 below, in connection with such installations.)
2. The purchase, by Grinnnell, from ADT, of sprinkler

supervisory and waterflow devices furnished and installed by ADT in replacement of those originally furnished and installed by Grinnell. The depreciated book value of the equipment so to be purchased by Grinnell amounts to $562,096. The price to be paid by Grinnell is still subject to negotiation, but is estimated in the neighborhood of $874,075. This purchase to be effected as of the date of agreement to be entered into between ADT and Grinnell.

3. The assumption, by Grinnell, of the obligation to provide sprinkler supervisory and waterflow devices required for future replacements in respect of installations in service as at the date of agreement to be entered into between ADT and Grinnell.

The Chairman stated that Mr. Gaston recommended acceptance of the offer. He said that Vice President J. W. Rahde had considered the matter and had discussed it with the company's counsel, Mr. W. D. Gaillard, Jr., and that the Vice President and Comptroller concurred in Mr. Gaston's recommendation. (See memorandum dated July 3, 1952 from Vice President J. W. Rahde, copy of which shall be filed with the minutes of this meeting.)

The Chairman said that he also concurred and he outlined briefly the various interests of Grinnell which would be disposed of by acceptance of the offer. (See letter dated July 2, 1952 from President E. F. Gaston, copy of which shall be filed with the minutes of this meeting.)

Thereupon, upon full discussion, on motion duly made and seconded, the following resolutions were unanimously adopted:

Resolved: That the President of the corporation be and he is hereby authorized to accept the offer of the Grinnell Corporation reported to the meeting by the Chairman, subject to the execution and delivery of an agreement satisfactory in form to the President, Vice President J. W. Rahde or the Comptroller, W. E. Pudney and the company's attorney, W. D. Gaillard, Jr., which agreement may reflect such modification of the amount to be paid by Grinnell for the purchase of ADT's replacement devices as, in further negotiation,

may prove necessary and, in the opinion of the President J. W. Rahde or Comptroller W. E. Pudney, be deemed proper, and further,

[fol. 5714] Resolved: That Edward F. Gaston, President or J. A. MacDonald, Vice President, be and each of them hereby is authorized, in the name and on behalf of this company and its controlled companies, and under their respective corporate seals, attested by the Secretary or an Assistant Secretary, to enter into an agreement with the Grinnell Corporation, in form approved by the President, Vice President J. W. Rahde or Comptroller W. E. Pudney and counsel, W. D. Gaillard, Jr., as necessary to give proper effect to the offer of the Grinnell Corporation acceptance of which is approved in the foregoing resolution."

[fol. 5715] Resolved: That the Treasurer be and he hereby is authorized, empowered and directed: (1) to invest the proceeds of $1,500,000, 1⅞% U.S.A. Treasury Certificates of Indebtedness, maturing July 1, 1952, in similar Certificates maturing June 1, 1953, (2) to invest in U.S.A. Treasury Bills, maturing October 9, 1952, the proceeds of $250,000 from similar Bills maturing July 10, 1952, and (3) to invest $850,000 of surplus funds, in U.S.A. Treasury Bills.

The Chairman stated that Mr. Gaston had reported upon negotiations with the Grinnell Corporation looking toward a resolution of various problems which had arisen and would arise under agreement dated April 29, 1907 between ADT and the Grinnell Corporation, which negotiations had produced an offer on the part of Grinnell to relinquish its interest under said agreement, at expiration on February 28, 1954, in consideration of:

1. The payment, by ADT, of 17½% of gross annual sprinkler supervisory and waterflow alarm service collections derived from installations in service at 2/18/54, excluding therefrom, increases in gross annual service charges due to rate increases effected subsequently to 2/18/54, such payments to continue for the lives of such installations (Grinnell to be entitled, upon the termination of each such

installation, to any devices it furnished and installed and any devices referred to in 2 and 3 below, in connection with such installations.)

2. The purchase, by Grinnell, from ADT, of sprinkler supervisory and waterflow devices furnished and installed by ADT in replacement of those originally furnished and installed by Grinnell. The depreciated book value of the equipment so to be purchased by Grinnell amounts to $562,096. The price to be paid by Grinnell is still subject to negotiation, but is estimated in the neighborhood of $874,075. This purchase to be effected as of the date of agreement to be entered into between ADT and Grinnell.
3. The assumption, by Grinnell, of the obligation to provide sprinkler supervisory and waterflow devices required for future replacements in respect of installations in service as at the date of agreement to be entered into between ADT and Grinnell.

The Chairman stated that Mr. Gaston recommended acceptance of the offer. He said that Vice President J. W. Rahde had considered the matter and had discussed it with the company's counsel, Mr. W. D. Gaillard, Jr., and that the Vice President and Comptroller concurred in Mr. Gaston's recommendation. (See memorandum dated July 3, 1952 from Vice President J. W. Rahde, copy of which shall be filed with the minutes of this meeting.)

The Chairman said that he also concurred and he outlined briefly the various interests of Grinnell which would be disposed of by acceptance of the offer. (See letter dated July 2, 1952 from President E. F. Gaston, copy of which shall be filed with the minutes of this meeting.)

Thereupon, upon full discussion, on motion duly made and seconded, the following resolutions were unanimously adopted:

Resolved: That the President of the corporation be and he hereby is authorized to accept the offer of the Grinnell Corporation reported to the meeting by the Chairman, subject to the execution and delivery of an agreement satisfactory in form to the President, Vice President J. W. Rahde or the Comptroller, W. E. [fol. 5716] Pudney and the company's attorney, W. D.

Gaillard, Jr., which agreement may reflect such modification of the amount to be paid by Grinnell for the purchase of ADT's replacement devices as, in further negotiation, may prove necessary and, in the opinion of the President and Vice President J. W. Rahde or Comptroller W. E. Pudney, be deemed proper and, further,

Resolved: That Edward F. Gaston, President or J. A. MacDonald, Vice President, be and each of them hereby is authorized, in the name and on behalf of this company and its controlled companies, and under their respective corporate seals, attested by the Secretary or an Assistant Secretary, to enter into an agreement with the Grinnell Corporation, in form approved by the President, Vice President J. W. Rahde or Comptroller W. E. Pudney and counsel, W. D. Gaillard, Jr., as necessary to give proper effect to the offer of the Grinnell Corporation acceptance of which is approved in the foregoing resolution.

There being no further business to come before the meeting, on motion duly made, seconded and carried, the meeting was adjourned.

J. A. MacDonald, Secretary.

[fol. 5717] July 3, 1952.

Mr. W. P. Marshall:

Grinnell Corporation

Appended is a memorandum dated July 2, 1952 by the President of ADT, reciting the situation growing out of an agreement dated April 29, 1907 between ADT and the Grinnell Corporation, which also reports upon negotiations with Grinnell over the past six years, culminating in an offer by Grinnell to wind up all of its interests in the agreement at its expiration, on February 18, 1954 in consideration of:

(1) the payment by ADT of 17½% of gross annual service collections from installations in service at 2/18/54, exclusive of increases in gross annual service charges due to subsequent rate increases, such payments to continue for the lives of such instalaltions (Grinnell to be entitled, upon the termination of each such instalaltion, to any devices it furnished and installed and any devices referred to in 2 and 3 below, in connection with such installations.)

(2) the purchase by Grinnell, from ADT, of certain devices furnished and installed by ADT in replacement of those originally furnished and installed by Grinnell;

(3) Grinnell's undertaking to provide devices required for future replacements in respect of installations in service at February 18, 1954.

Mr. Gaston recommends acceptance of the offer. I have reviewed the matter with officers of ADT and with Mr. W. D. Gaillard, Jr. who has acted as the company's counsel throughout these negotiations and submit the following comments and recommendation:

Grinnell's specific interests in the business which is the subject of the agreement are well set out in Mr. Gaston's memorandum. Mr. Gaillard, who has a first-hand familiarity with the terms of the 1907 agreement with Grinnell, through participation in negotiations over a period of six

years, substantiated Mr. Gaston's representation that Grinnell would have a reasonable basis for establishing the value of its terminal equity in the agreement as equal to 19.6% of diminishing gross receipts.

In addition to having negotiated with Grinnell for acceptance of 17½% of gross receipts, frozen at the 1954 level, calculated to raise its annual return on plant investment from 5.4% to 8.7%, ADT has been able to exact further benefits, from Grinnell, as presented in Section B of Exhibit B which forms part of Mr. Gaston's attached memorandum, which include a net non-recurring gain in earnings amounting to $390,600 proceeding from the sale of devices to Grinnell, plus a windfall gain in cash receipts, from the same source, amounting to $736,800. The precise form of contract to be entered into with Grinnell is presently under consideration by Mr. Gaillard, but should occasion no very great difficulty.

In consideration of the economics of the proposal and [fol. 5718] the risks involved in the prolonged and costly litigation that probably would inevitably ensue in the adjudication of Grinnell's claim to residual contract equities, I consider the offer is an advantageous one to ADT. I therefore endorse Mr. Gaston's recommendation for the acceptance, in substance, of Grinnell's proposal. If you agree, the following has been suggested by Mr. Gaillard for inclusion in the minutes of ADT's next regular monthly Board Meeting scheduled for Wednesday, July 9, 1952:

> "The Chairman stated that Mr. Gaston had reported upon negotiations with the Grinnell Corporation looking toward a resolution of various problems which had arisen and would arise under agreement dated April 29, 1907 between ADT and the Grinnell Corporation, which negotiations had produced an offer on the part of Grinnell to relinquish its interest under said agreement, at expiration on February 28, 1954, in consideration of:
>
> 1. The payment, by ADT, of 17½% of gross annual sprinkler supervisory and waterflow alarm service collections derived from installations in service at 2/18/54, excluding therefrom, increases in gross annual service charges due to rate increases

effected subsequently to 2/18/54, such payments to continue for the lives of such installations (Grinnell to be entitled, upon the termination of each such installation, to any devices it furnished and installed, and any devices referred to in 2 and 3 below, in connection with such installations.)

2. The purchase, by Grinnell, from ADT, of sprinkler supervisory and waterflow devices furnished and installed by ADT in replacement of those originally furnished and installed by Grinnell. The depreciated book value of the equipment so to be purchased by Grinnell amounts to $562,096. The price to be paid by Grinnell is still subject to negotiation, but is estimated in the neighborhood of $874,075.
3. The assumption, by Grinnell, of the obligation to provide sprinkler supervisory and waterflow devices required for future replacements in respect of installations in service at February 18, 1954.

"The Chairman stated that Mr. Gaston recommended acceptance of the offer. He said that Vice President J. W. Rahde had considered the matter and had discused it with the company's counsel, Mr. W. D. Gaillard, Jr., and that the Vice President and Comptroller concurred in Mr. Gaston's recommendation.

"The Chairman said that he also concurred and he outlined briefly the various interests of Grinnell which would be disposed of by acceptance of the offer.

"Thereupon, upon full discussion, on motion duly made and seconded, the following resolution was unanimously adopted:

[fol. 5719] "Resolved: That the President of the corporation be and he hereby is authorized to accept the offer of the Grinnell Corporation reported to the meeting by the Chairman, subject to the execution and delivery of an agreement satisfactory in form to the President, Vice President J. W. Rahde or the Comptroller, W. E. Pudney and the company's attorney, W. D. Gaillard, Jr., which agreement may reflect such modification of

the amount to be paid by Grinnell for the purchase of ADT's replacement devices as, in further negotiation, may prove necessary and, in the opinion of the President and Vice President J. W. Rahde or Comptroller W. E. Pudney, be deemed proper and, further,

"Resolved: That Edward F. Gaston, President or J. A. MacDonald, Vice President, be and each of them hereby is authorized, in the name and on behalf of this company and its controlled companies, and under their respective corporate seals, attested by the Secretary or an Assistant Secretary, to enter into an agreement with the Grinnell Corporation, in form approved by the President, Vice President J. W. Rahde or Comptroller W. E. Pudney and counsel, W. D. Gaillard, Jr., as necessary to give proper effect to the offer of the Grinnell Corporation acceptance of which is approved in the foregoing resolution."

In the event the foregoing appears satisfactory you may wish to ask Mr. Gaston to include the preamble and resolutions in the order of business for the meeting of the Board of Directors on Wednesday, July 9, 1952. Mr. Gaillard has indicated his willingness to be present at the meeting, if you desire, for the purpose of elaborating on all legal points involved.

J. W. Rahde.

[fol. 5720]

July 2, 1952.

Mr. J. W. Rahde, Vice President
American District Telegraph Company
60 Hudson Street, New York 13, N. Y.

Grinnell Corporation

Dear Mr. Rahde:

In 1907, ADT Co. (N. J.) and Grinnell Corporation entered into an agreement to cooperate in supplying sprinkler supervisory and waterflow (SS & WF) service, throughout the United States, under which the latter furnishes and installs certain devices required in supplying the service, receiving, in return, 25% of all collections. The agree-

ment, which expires on February 18, 1954, is silent as to the equities of the respective parties on contract termination.

Since 1946, in collaboration with Mr. W. D. Gaillard, Jr., of Milbank, Tweed, Hope & Hadley, we have been negotiating with Grinnell looking towards composure of the terminal equities of the two companies. It was ADT's initial thought that Grnnell's collaboration in the furnishing of SS & WF service was very useful, though somewhat expensive. We hoped to work out some arrangement under which Grinnell would furnish and install SS & WF devices and otherwise aid in the growth of this service, under an agreement pretty much along the lines of the existing one, but in which Grinnell's participation in gross collections would be cut from 25% to something between 15% and 20%. It has developed, however, that there is no likelihood that a mutually satisfactory basis for extension of the arrangement with Grinnell can be evolved.

In drawn out negotiations, ADT and Grinnell came to realization that the divergent views of the parties left no alternative to severance of relationships, at 2/18/54, as respects the furnishing of SS & WF service to new subscribers, but even this decision required continued negotiation in connection wth the satisfaction of the rights of each party in the accumulated volume of SS & WF business in service as at that date.

Grinnell conceives the 1907 agreement to constitute something of a joint venture in the nature of a partnership, with each "partnership" corporation, at contract termination, falling under obligation to continue to contribute the materials and services which was its special undertaking, with respect of all contracts entered into with subscribers during the duration of the 1907 agreement and extending for the life of the installations involved. Inability to come to mutually satisfactory settlement of contract terminal equities probably would result in long and costly litigation, the outcome of which is quite uncertain.

Following protracted discussions as to the value of Grinnell's contract terminal equity, that company expressed a willingness to accept 20% of gross annual service charges derived from SS & WF installations in service at 2/18/54, foregoing all participation in increases in gross annual servce charges due to subsequent rate increases and in reve-

nue derived from the furnishing of new or additional service.

ADT has been able to induce Grinnell to agree to accept 17½% participation instead of the 20% originally suggested and, further, to purchase, from ADT, SS & WF devices furnished and installed by ADT, in replacement [fol. 5721] of those originally furnished and installed by Grinnell, that company also to provide SS & WF devices required for future replacements in respect of installations in service at February 18, 1954. As shown hereunder, settlement with Grinnell, on this basis, appears attractive from our own appraisals of values.

Exhibit A, attached, shows that Grinnell would have no great difficulty in representing the value of its equity in the SS & WF business as equal to 19.6% of diminishing gross annual receipts. Consequently, the economy to ADT of the proposal to allow Grinnell 17½% participation is manifest, even without consideration of the further advantage offered, in the requirement that Grinnell buy ADT's replacement devices and furnish devices for the future replacements described above. Exhibit B shows the approximate financial and other results of the proposed settlement.

The proposed settlement would require no financing. Grinnell will be paid out of current cash collections. There appear to be no serious tax consequences to flow from this transaction, although ADT probably would be faced with a capital gains tax incident to the acquisition by Grinnell of device replacements heretofore installed by ADT at its expense. ADT is under no commitment to pay Grinnell fixed annual recompense and thus is safeguarded against unforeseen advances in the art which might serve to depress SS & WF receipts. The attractiveness of the potential profit figure subsequently to 1954 seems obvious.

We desire to recommend acceptance of this proposed settlement to Mr. Marshall for favorable endorsement to the Board of Directors, if the proposal has your endorsement and concurrence and that also of Mr. Pudney. Mr. MacDonald and I will hold ourselves ready to supply any information you desire and I am sure Mr. Gaillard, likewise will be available.

In the event our contractual relations with the Grinnell Corporation are concluded pursuant to this recommenda-

tion, there will remain for negotiation with the Automatic Fire Alarm Company the disposition of the latter's interest in SS & WF business in New York, Boston and Philadelphia. Grinnell owns about 89% of the capital stock of the AFA Company. We have been desirous, throughout, of concluding both negotiations simultaneously, but we now find Grinnell anxious to reach agreement on its own behalf before engaging in negotiations for account of the AFA Company. While there would be an obvious advantage in the dual negotiation, there is advantage, likewise in getting the larger settlement out of the way. Subject to the feeling of Mr. Pudney and yourself in the matter and to Mr. Gaillard's view, we can see no real objection to conclusion of negotiations with Grinnell on an independent basis.

Very truly yours, (Signed) E. Gaston, President.

[fol. 5722] Exhibit A

Grinnell Corporation Negotiations

Estimated Worth of Grinnell's Terminal Equity Expressed as a Percentage of Diminishing Gross SS & WF Receipts Over a 20 Year Period

1. Total recurring annual service charge under central station SS & WF contracts	$ 6,241,696
2. Grinnell's terminal equity 50% (Note 1)	$ 3,120,848
3. Net income before Federal income taxes which item 2 would produce for Grinnell based on ADT's operating profit ratio of 30.96% of gross revenue	$ 966,215
4. Value of Grinnell's terminal equity based on capitalization of foregoing at 10%	$ 9,662,000
5 Interest at 5% computed quarterly on unpaid balances, assuming equal installment payments over 20 year period	$ 4,891,000
6. Total worth of Grinnell's terminal equity represented by payments of principal and interest	$14,553,000
7. Projected total SS & WF receipts on diminishing basic over 20 year period	$74,089,600
8. Percentage of total worth of Grinnell's terminal equity to projected gross SS &WF receipts	19.6%

Note 1

It is impossible for anyone to be categoric as to the extent of Grinnell's terminal equity in the business. It is Mr. Gaillard's best judgment that such equity does not amount to 50%, but, on the other hand, he has said that the disadvantages inherent in judicial proceedings for the purpose of establishing Grinnell's rights, and doubts which he concedes exist as to the outcome of any such proceeding, cause him to feel that it constitutes a reasonable exercise of judgment to use a 50% terminal equity figure in the foregoing approach to the valuation problem involved.

[fol. 5723]

Exhibit B

Showing Approximate Financial and Other Results of Proposed Settlement with Grinnell Corporation

	Net Income Before Settlement	Improvement Resulting from settlement	Net Income After Settlement
A. Improved return on plant investment			
Gross annual SS&WF service charges (1)	$6,549,734	$ —	$6,549,734
Grinnell's proportion	1,560,424	468,127	1,092,237
ADT's proportion	$4,989,310	$ 468,127	$5,457,437
Operating expenses, excluding depreciation	$4,051,298	—	$4,051,293
Depreciation expense	541,288	29,948(2)	511,340
Total operating expenses	$4,592,586	29,948	$4,562,638
Net earnings from annual service charges	$ 396,724	$ 498,075	$ 894,799
Net earnings from advance service charges	559,137	—	559,137
Net earnings before Federal taxes	$ 955,861	$ 498,075	$1,453,936
Federal income taxes 52%	497,048	258,999	756,047
Net income	$ 458,813	$ 239,076	$ 697,889
Gross SS&WF plant investment	$8,547,917	$ 562,096	$7,985,821
Percentage return on plant investment	5.4		8.7

(1) Includes $308,038 derived from Ind. Proc. Service in which Grinnell does not participate.
(2) Resulting from sale of Grinnell SS&WF devices having book value of $562,096.

B. Additional benefits derived

(1) Windfall gain in cash and earnings from sale of SS&WF devices	
Estimated amount of payment by Grinnell	$ 874,075
Approximate depreciated value of devices sold (61.60%)	346,251
Estimated net capital gain	$ 527,824
Federal tax 26%	137,234
Net gain in earnings (non-recurring)	$ 390,590
Net gain in cash	$ 736,841

(2) 25% improvement in annual charges under all future contracts for SS&WF service.
(3) Ability to work with independent sprinkler installing companies throughout the United States in cultivation of sprinkler supervisory service.
(4) Avoidance of long drawn out and costly litigation the outcome of which is uncertain.

RVICES, 1961-1962

port to

EAKLEY, PLATT, SCHMIDT, HART & FRITZ

Arthur D. Little, Inc.

3865

U. S. MARKET FOR ELECTRIC PROTECTION SERVICES, 1961-1962

Report to

BLEAKLEY, PLATT, SCHMIDT, HART & FRITZ

C-66371

This report is rendered upon the condition that it is not to be reproduced in whole or in part for advertising or other purposes without the special permission in writing of Arthur D. Little, Inc.

I. SUMMARY

POSE AND SCOPE

The purpose of this study was to determine the 1961 market share of in electric protection service companies in the continental United States, ding Alaska and Hawaii. The companies whose collective market share was ured are: American District Telegraph Company, Automatic Fire Alarm any, and Holmes Electric Protective Company, all of whom are defendants overnment suit. These companies will be referred to hereafter as the dant alarm companies.

The term "electric protection services" applies to the following ser- that commercial firms provide to commerce, industry, institutions, and rnment:

1. Central station service,
2. Local alarm service,
3. Auxiliary alarm service,
4. Remote alarm service,
5. Proprietary alarm service, and
6. Telephone answering alarm service.

CLUSIONS

On the basis of sales of electric protection services in metropolitan as defined by the U. S. Census Bureau[1] the defendant alarm companies'

---

ndard metropolitan statistical area (SMSA) is a "county or group of continguous counties (except ngland) which contains at least one city of 50,000 inhabitants or more or 'twin cities' with a com- population of at least 50,000. In addition to the county or counties, containing such a city or cities, guous counties are included in a standard metropolitan statistical area if, according to certain crite- ey are essentially metropolitan in character and are socially and economically integrated with the l city. In New England, towns and cities are the units used in defining standard metropolitan statis- reas. Statistical Abstract of the United States, 1961 - U. S. Department of Commerce, Bureau of nsus, U. S. Government Printing Office, page 14, No. 10, "Population of Standard Metropolitan ical Areas - 1960."

share of the national market is estimated at 36.3%. If we include sales in politan areas in which the defendant alarm companies are not active, the the national market accounted for by the defendant alarm companies is redu to 36.0%.

Our conclusion is based upon a survey of firms located in 17 stand metropolitan statistical areas (SMSA's) that are statistically representative all such areas in the continental United States. We estimate that 427 firms than the defendant alarm companies provided electric protection service in t sample areas in 1961. The total number of people employed by all electric p tection service companies is 8594 in the sample areas; the defendant alarm c panies employ 2477. Therefore, the defendant alarm companies' share of em ees is $\frac{2477}{8594} = 29\%$. Since the defendant alarm companies' annual revenue per employee is $12,500 and that for the rest of the industry is approximately $ the defendant alarm companies' share of revenue in the areas where they are active is

$$\frac{2477 \times 12{,}500}{2477 \times 12{,}500 + 6038 \times 8994} = 36.3\%$$

and in the entire continental United States is

$$\frac{2477 \times 12{,}500}{2477 \times 12{,}500 + 6117 \times 8994} = 36.0\%$$

II. METHOD

The size of the U. S. market for electrical protection services can be ured in terms of dollars spent annually by buyers of such services or dol- received annually by sellers of such services. Since neither figure can be ned from any known data source, a survey of some sort is needed.

Because a survey of users would require substantially more time and than a survey of suppliers, we surveyed the suppliers of electric protection ces: that is, firms who represent themselves as offering these services in ified telephone directories. The size of the market is defined as the aggre- annual revenue of these suppliers.

This study covered only the merchant market. Therefore, the annual ue figure stated in this report is somewhat less than the total amount spent lly by users of electric protection services because it does not include the ve market; that is, the expenditures of firms or individuals providing these ces for themselves.

We adopted the following method to determine the size of the merchant et and the shares held by the defendant alarm companies.

1. We determined the number of firms in the relevant line of business e basis of listings in the telephone directories of 17 SMSA's and telephone views to establish whether they do provide one or more of the electric pro- on services listed in the directories.

2. We interviewed these firms to determine the number of employees firm and hence the total number of employees engaged in providing this service.

3. On the basis of results of 55 depositions (taken by counsel) of a ller number of firms, we determined annual revenue and number of employees ese firms. The information was used to determine average annual income employee and hence total dollar volume. Since the volume of the defendant m companies is known, their share of the market can be determined.

III. STATISTICAL PROCEDURE

A. DETERMINATION OF THE NUMBER OF FIRMS

As the first stage of a two-stage, self-weighting, probability sample electrical protective service suppliers, a sample of 17 SMSA's with a combine population of 42,565,000 was drawn from the set of all SMSA's stratified by bro geographical area and population size. Within each stratum, individual SMSA's were selected by a random process, but in a way that assured a representation each broad area roughly proportionate to population. A detailed description of selection of the primary sample is given in Appendix A.

Within each metropolitan area selected, we prepared lists of firms t advertised in telephone directories that they offer electric protection services.

We collected the telephone directories covering the entire metropoli area. By breaking down each metropolitan area into counties, listing all post of fice addresses (city, town, etc.) in those counties, and collecting telephone dire tories for those post office addresses, we completely covered each SMSA. In a cases, the central city was covered. In the few instances in which telephone di rectories for outlying communities were not obtained, local firms with no listin in the central directories were omitted from the coverage.[2] These firms, howe represent at best a small part of the population.

B. ESTIMATING THE AVERAGE NUMBER OF EMPLOYEES PER FIRM AND THE DEFENDANT ALARM COMPANIES' SHARE

From the telephone directories, we prepared lists of addresses and telephone numbers of firms which advertised that they provided any of the follo ing services:

[2] Any bias introduced by the omission of these firms is in the direction of overstating the defendant alarm companies' market share, since the omitted firms tend to be smaller local firms.

- Burglar alarm systems,
- Fire alarm systems,
- Signal systems, or
- Automatic sprinkler systems.

These listings commonly appear in yellow pages as classifications which electric protection service companies advertise their services. use we recognized that other kinds of services also might be listed under classifications, our interviews had to include questions as to whether in e firm interviewed is in the electric protection service business.

The defendant alarm companies and other firms offering electric pro- n systems customarily list themselves under these categories in telephone tories.

We set up a telephone interviewing program which was carried out r the general direction of Mr. Lester Frankel, Executive Vice President of s & Surveys Company, Inc., 640 Fifth Avenue, New York 19, New York. interviewing program was carried out under the day-to-day direction of Nicholas Pavlov of the same firm. Audits & Surveys Company prepared en instructions for the interviewers, written definitions of fire and burglary ection systems, and the written questionnaire, and kept record sheets on all . Either the sales manager, the proprietor, the manager, or the production ger of each firm was interviewed. (Appendix B includes copies of the ques- aire, the interviewer's instructions, the definition of the systems under study, all record sheets used by Audits & Surveys Company, Inc.)

ESTABLISHING DEFENDANT ALARM COMPANIES' SHARE OF INDUSTRY REVENUE

The defendant alarm companies' share of industry revenue may be ressed by the following formula:

$$\frac{N_o \cdot R_o}{N_o R_o + N_1 R_1}$$

where No is the number of employees of defendant alarm companies;

N_1 is the number of employees in the rest of the industry;

Ro is revenue per employee for the defendant alarm companies; a

R_1 is revenue per employee for the rest of the industry.

On the basis of depositions from 55 electrical protective service f it was found that the average revenue per employee is 1961 was $8994. The tailed data are given in Appendix E. The revenue per employee of the defe alarm companies is $12,500. Therefore, the share of revenue (share of mar of the defendant alarm companies in the areas where they are active is

$$\frac{2477 \times 12{,}500}{2477 \times 12{,}500 + 6038 \times 8994} = 36.3\%$$

and in the entire continental United States is

$$\frac{2477 \times 12{,}500}{2477 \times 12{,}500 + 6117 \times 8994} = 36.0\%$$

Firms engaged in the same line of business all tend to have similar volumes of annual dollar sales per employee. Thus, although this ratio varies somewhat from firm to firm in the same industry, the nature of a firm's oper tions governs the ratio of sales to employees, and variations among firms in t same business are accounted for by such factors as efficiency differences.

APPENDICES

[fol. 5733]

APPENDIX A
AREA SAMPLING PROCEDURE

This is a description of the selection of primary sampling units in a multistage sample of suppliers of protective services in SMSA's in the conti- tal United States.

The sample is designed to be a self-weighting stratified sample. The following section describes the method of stratifying the primary sampling units by geographic region and by city size within each region with probability of selection proportional to city size.

METHOD

1. Population figures were obtained from the 1961 Statistical Abstract of the United States, Table 10 (pages 14-20), entitled: "Population of Standard Metropolitan Statistical Areas: 1960". The table is headed by the following definition:

> "A standard metropolitan statistical area is a county or group of contiguous counties (except in New England) which contains at least one city of 50,000 inhabitants or more or 'twin cities' with a combined population of at least 50,000. In addition to the county or counties, containing such a city or cities, contiguous counties are included in a standard metropolitan statistical area if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, towns and cities are the units used in defining standard metropolitan statistical areas. This list of areas is based on 'Standard Metropolitan Statistical Areas, 1961' issued by the Executive Office of the President, Bureau of the Budget."

2. The metropolitan areas in this table were grouped in the four U. Census Bureau regions: East, Central, South, or West. Those in each region were then ranked by population, from largest to smallest. (The population of entire standard metropolitan area was used.) These figures were listed on the accompanying adding machine tapes, along with cumulative subtotals.

3. In order to determine the number of sample points to draw from region (N_e, N_c, N_s, N_w, such that $N_e + N_c + N_s + N_w = N = 21$), we listed egional total populations and the cumulative populations as follows:

Region	Regional Population (F_i)	Cumulative Population
West	19,627,908	19,627,908
South	26,074,866	45,702,774
Central	31,016,044	76,718,818
East	35,653,951	112,372,769
	112,372,769	

etermined a skip interval by dividing total population by the number of le points:

$$\frac{112,372,769}{21} = 5,351,084$$

a random number between 0 and 5,351,084 was chosen from Table 1.5.1 in stical Methods, by George W. Snedecor; the result was 1,159,000.

This random number provided a starting point to which the skip value repeatedly added until the total was greater than, or equal to, the total popu- n of all regions (112,372,769). After each addition, we examined the total to n what category it fell. The number of times that the subtotals fell in each ory gave us the number of points to draw from that category for our sample. andom start counts for one "fall" in the West region.

Using the above procedure, we determined the allocation to each region o be:

West	4
South	5
Central	6
East	6
	21

3876 4. The next step was to pick out the areas in each region to constitute our sample. In the West, for example, we must pick out 4 sample points. We find a skip interval by dividing total regional population P_W by the sample size N_W:

$$= \frac{19,627,908}{4} = 4,906,977 \qquad \text{(for West)}$$

Starting with another random number: 2,251,855, the skip interval was successively added, giving the following listing (for West):

2,251,855
7,158,832
12,065,809
16,972,786

Each of these four numbers was then compared with the listing of subtotals on the adding machine tape (for West). When a number fell between two subtotals on the tape, the area at that place on the tape was chosen to be in the sample. Check marks were placed on the tape to indicate these SMSA's.

The same procedure was applied to the other three regions; the following listing for skip intervals was added to an initial random number:

South	Central	East
897,555	3,268,820	3,177,605
6,112,528	8,438,161	9,119,930
11,327,501	13,607,502	15,062,255
16,542,474	18,776,843	21,004,580
21,757,447	23,946,184	26,946,905
	29,115,525	32,889,230

(Note that in the East region, the first area on the list, New York gets selected twice.)

There were 21 SMSA selections by this method, including New York was selected twice. Thus 20 separate SMSA's were selected. During the of the study, we combined the SMSA of Gary - Hammond - East Chicago, . with that of Chicago, Illinois, because of the fact that electric protection e companies in each city serve customers in the other, and so there is a on market. This reduced the number of separate market areas to 19. cola, Florida, selected as an SMSA in which the defendant alarm companies t active, and among the smallest of the SMSA's in the original sample, was ed because of respondents' refusals to provide information on number of yees. This reduced the number to 18. Johnstown, Pennsylvania, was ed because of its overlap with SMSA Erie, which was not in our sample. priate steps were taken to allow for the factor of overlap in arriving at nclusions on defendant companies' market share.

APPENDIX B

INTERVIEWERS' INSTRUCTIONS, SERVICE DEFINITIONS, QUESTIONNAIRE, and CALL RECORD SHEET

INTERVIEWERS' INSTRUCTIONS

This study is about electric devices or systems that protect bus establishments or homes against hazards of fire or burglary. We want to k what kinds of devices are produced, installed, or serviced by companies sp izing in protective services.

Attached to these instructions is a sheet entitled "Fire and Burgl Protection Systems." It explains the terminology used in the questionnaire you should familiarize yourself with it.

The questionnaire is short and simple. The main problem of this is to get the right respondent and to enlist his cooperation.

Whom to Interview

You have received a set of cards. (These cards must be returned after you complete your assignment.) Each card lists the name and the telep number of some company. Call the number. When someone answers, make that you have the company listed on the card. If not, one of four things could happened:

(1) You may have dialed the wrong number. Dial again.
You may have dialed the correct number but:

(2) The company changed the number. Dial the new number and correct the number that appears on the card.

(3) The company went out of business. Indicate this on the card. Do not dial.

(4) The company moved out of town. Indicate this on the card. Do not dial.

After you make sure that you have the right company, ask to speak to les manager. You may say, "I am _____ of Audits & Surveys. speak to the sales manager." If you are asked what is it you want to speak about, you may say, "We are interested in learning more about the kind(s) tective services you offer." If you are not connected directly to the sales ger but to his secretary, you will have to repeat the above.

Note: Some of the companies are small and do not have a sales manager e sales manager may be out of town). Ask to speak to the proprietor, the ger, or the production manager—in that order.

When you get to the sales manager or to anyone of the persons mentioned above, use the introduction printed on the questionnaire.

Should he want to know more about the reasons for your calling him, may tell him that Audits & Surveys is an independent market research company that we are doing a nationwide study of the protective service field, that we appreciate his cooperation, and that all the information he gives us will be in strict confidence.

The above is only a suggestion. You may say as little or as much as tuation warrants.

Call Record Sheet

It is important that every time you dial a number you record the results ur dialing it and that you do it correctly. Follow these instructions with the of the Call Record Sheet.

Before you dial the number that appears on the card, write down on the Record Sheet the name and telephone number of the company.

If you get a busy signal, check in Column (1) and dial later on (in about inutes).

[fol. 5739]

3880 If company went out of business or moved out of town, indicate Call Record Sheet (in addition to having indicated it on the card).

After you make sure that you have the right company and the right person, write down the name of the respondent.

Respondent may not be available at the time of the first call. Ask he will be available, write down the date and time on the Call Record Sheet Column (2) and call back at that time.

Respondent may refuse. Put a check in Column (3) of the Call Re Sheet opposite the respondent's name and do not call back.

If you interviewed the respondent, put a check in Column (4) oppo the respondent's name.

Note that you have to call back on those companies that had busy s or where the respondent was not available at the time of the first call. On t first call-back you again may:

Get a busy signal. Put a check in Column (5). Call back.

Be told that the respondent is not available. Ask when he will be available. Write down the date and time on the Call Record Sheet opposite the name of the respondent in Column (6). Call back at that time.

Get a refusal. Put a check in Column (7). Do not call back.

Get an interview. Put a check in Column (8), always opposite the name of the respondent.

Now you have to call back for the second time (3rd call) on those panies that had busy signals or where the respondent was not available at the

first call back (2nd call). On this call back, you again may:

Get a busy signal. Put a check in Column (9). Do not call back.

Be told that the respondent is not available. This time just put a check (not date and time) in Column (10). Do not call back.

Get a refusal. Put a check in Column (11).

Get an interview. Put a check in Column (12).

Please remember that you write down on the Call Record Sheet the , the telephone number of the company, and the name of respondents only All the information regarding your calls on a company is put opposite the of the company in corresponding columns.

IMPORTANT: The interviewing starts on Monday, November 20th. your first call shortly after 9 a.m. and continue until 4:30 p.m. The last viewing day is Friday, November 24th. All questionnaires have to be mailed riday night. However, we would appreciate it if you would plan your work so ou can finish interviewing and mail all questionnaires on Thursday, Novem- 3rd. Especially if you are on the West Coast.

On Monday night (November 20th) please add:

Number of companies you entered on the Call Record Sheets
Number of interviews you completed on the 1st call (Column #4)
Number of interviews you completed on the 2nd call (Column #8)
Number of interviews you completed on the 3rd call (Column #12)

Then please send Ruth Haverstock, Audits & Surveys, a wire of these nts:

Number of companies _____
Number you have entered on Call Record Sheets

[fol. 5741]

3882

1st call — Number of checks in Column #4

2nd call — Number of checks in Column #8

3rd call — Number of checks in Column #12

Questionnaire

The only difficulty you may encounter is that the respondent may not understand what exactly is meant by terminology used in some of the questions. Do not explain. Just write in "Doesn't understand" under the question(s) which respondent did not understand. Of course, some respondents may not know what are the answers to some of the questions. Do not forget to write in "Don't know" under all questions for which you received "Don't know" as an answer.

SERVICE DEFINITIONS

Central Station Service

Burglary

Devices installed in your premises send a signal over electrical wires to an office of the protection company when someone enters or attempts to enter your premises during closed hours. The office of the protection company receives the signal, sends its own guards to your premises and notifies the local police department. The protection company office provides continuous service.

Fire

Devices installed in your premises send a signal over electrical wires to an office of the protection company when there is some event on your premises which would indicate a fire. The office of the protection company receives the signal, sends its own guards to your premises and notifies the local fire department. The protection company office provides continuous service.

Local Alarm Service

Burglary

Devices installed in your premises cause a loud bell to ring on the
e of your premises when someone enters or attempts to enter your prem-
during your closed hours.

Fire

Devices installed in your premises, operated by hand or automatically,
a loud bell on your premises to indicate the existence of a fire.

Telephone Answering Alarm Service

Devices installed in your premises send a signal over electrical wires
elephone answering service when someone enters or attempts to enter your
ises during closed hours or at any time when there is some event on your
ises which would indicate a fire. Upon receiving the signal, the telephone
ering service notifies the local police or fire department or other appropri-
ersons.

Direct Connected or Remote Service

Burglary

Devices installed in your premises send a signal over electrical wires
tly to the local police department when someone enters or attempts to enter
premises. These devices will operate at any time.

Fire

Devices installed in your premises send a signal over electrical wires
tly to the local fire department when there is some event on your premises
h would indicate a fire.

Auxiliary Alarm Service

Devices installed in your premises are connected to the municipal alarm box near your premises and send a signal over that system to the fire department when there is some event on your premises which would indicate a fire.

Proprietary Alarm Service

Devices installed in your premises send a signal over electrical wi to a central point, located on your premises, when there is an unauthorized en of your premises or when there is some event on your premises which would indicate a fire. The central point at which the signal is received is supervise by one of your employees and the protective system is owned by you.

Central Station Supervised Watchmen Service

You may employ watchmen on your premises during non-working ho These watchmen are required to punch devices at various points on your premises, each of which sends a signal to a central station. If the central station do not receive a signal at predetermined intervals, they send an investigator to ch your premises.

Clock Supervised Watchmen Service

You may employ watchmen on your premises during non-working ho who make scheduled rounds. During these rounds, they are required to punch devices which record the time on a tape of disk device carried by the watchme

Unsupervised Watchmen Service

You may employ watchmen on your premises who are generally responsible for the premises. You do not supervise their rounds.

APPENDIX C
ESTIMATING PROCEDURE

It is, of course, a practical impossibility to establish the exact market of the defendant alarm companies by making a complete census of all firms ed in the electric protection service in the United States. The market share therefore be measured by other means. This has been done by using the ique of statistical sampling described in (1). By a careful application of echnique one can obtain close approximations to the true figures which are ically designated as statistical estimates.

Statistical estimates are, to a certain extent, affected by chance devia- of the selected sample (i.e., those among the listed companies which could tacted and which could furnish unambiguous figures) from the entire popu- which it represents. The way the estimates reported here were made it is ly likely that the true figure lies above or below the reported estimate. It tomary to compute the socalled standard deviation of the statistical esti- as a measure of the magnitude of such deviations. We also have computed ided confidence limits for our estimates. For the estimates of the number ployees in the electric protection service business, the confidence limit is re sufficiently far below our estimate of this number that we may assert 0% probability that the true number of employees is not lower. For the ates of the defendant alarm companies' market share based on revenue, nfidence limit is a percentage figure higher than our estimate of the market to a sufficient degree so that we may assert with 90% probability that the market share does not exceed this limit.

The term "statistical estimate" does not imply any introduction of ctive judgment, but denotes a scientific method of arriving at a total figure n entire population (of form in this instance) when actual counts are available for a sample.

The defendant alarm companies have taken the greatest care to avoid bias in the selection of this sample and in the interpretation of the facts stated

by representatives of the firms included in the sample survey, when the representatives could not furnish complete or unambiguous answers.

The estimate of the number of firms (excluding the defendant alarm companies) engaged in the electric protective service business was determined separately in each SMSA, as follows:*

$$y = N \times B$$

where

y = estimated number of firms in bus. excl. DAC

N = number of firms listed in the yellow pages of the telephone books of the SMSA under one of the following headings:

Burglar Alarm Systems
Fire Alarm Systems
Signal Alarm Systems
Springkler Alarm Systems

Attempts were made to contact all of these firms. 472 of the 637 firms listed were contacted.

B = proportion of above firms which are in bus. and not a branch of the defendant alarm companies.

The proportion B itself was determined as follows:

$$B = \bar{\bar{n}}/n$$

where

n = number of firms with which contact could be established in the telephone survey

$\bar{\bar{n}}$ = number of firms, excl. DAC, among the contacted firms which were in bus.

The number of employees, excl. DAC, in bus. was estimated as follows:

$$A = (e/\bar{n})\ k$$

where

$\bar{n}$ = number of firms among those contacted, excl. DAC, which were in bus. and could furnish unequivocal figures for the number of their employees engaged in the electric protective service business.

* Throughout this appendix, the legend "excl. DAC" shall mean "exclusive of the defendant alarm companies" and "in bus." shall mean "engaged in the electric protective service busines."

e = the total of such employees for the above $\bar{n}$ firms.

k = adjustment factor for overlap with other SMSA's.

The adjustment factor k was taken to be identical for all 17 SMSA's .85). It was estimated from the data of a random subsample of all firms in of the defendant alarm companies for which more detailed information was ilble. This information included a statement by the firm on what fraction of irm's electric protective service was furnished within the SMSA in which the was located. A weighted average of these stated fractions was determined, as weight the numbers of employees in bus., increased by one, of each firm subsample. The adjustment factor k may have been estimated too low, in lectric protective service furnished by firms outside their home SMSA may been furnished in another of the 17 SMSA's included in our estimates. This restimate would have the effect of slightly overestimating the market share e defendant alarm companies.

The combined total estimate of employees in bus., excl. ADT, for all MSA's was 7196 before adjusting for overlaps and 6117 after adjusting for laps.

OWANCE FOR CHANCE FLUCTUATIONS

We assumed that the estimate E of the total number of employees in , excl. ADT, had approximately a normal probability distribution for each A and, a fortiori, for all 17 SMSA's combined. We further assumed that the mates for different SMSA's were independently distributed so that the variance all 17 SMSA's combined was the sum of the variances for each SMSA.

c, for each SMSA,

$$E = y \times A$$

found the variance v(E) to be approximately equal to

$$v(E) = A^2 v(y) + y^2 v(A)$$

where v(y), v(A) are the variances of y and A respectively.

For v(y) we determined the small sample estimate

$$v(y) = \frac{N(N-n)}{n-1} B(1-B)$$ (See Cochran* formula 2, 19)

The small sample estimate for v(A) was

$$v(A) = v(e)\frac{y-\bar{n}}{y-\bar{n}} \times (.85)^2$$ (See Cochran formula 2, 18)

where v(e) was the observed mean square error of the number of employees in the $\bar{n}$ firms which could furnish acceptable figures for employees in bus. That is

$$v(e) = \frac{1}{\bar{n}-1} \sum_{i=1}^{\bar{n}} (e_i - \bar{e})^2 ; \bar{e} = \frac{1}{\bar{n}} \sum_{i=1}^{\bar{n}} e_i ;$$

The standard deviation of E is given by

$$\sigma(E) = \sqrt{v(E)}$$

The variance and standard deviation of the estimated number E* of all employ in bus. for all 17 SMSA's combined which number includes the employees of t defendant alarm companies are equal to the variance and standard deviation o respectively as the number of employees of the defendant alarm companies is known and fixed.

The reciprocal s^{-1} of the defendant alarm companies' market share based on revenue is given by the formula

$$s^{-1} = \frac{E_o \times 12.500 + E \times 8994}{E_o \times 12.500}$$

where E_o is the number of employees of the defendant alarm companies and E the estimated number of employees in the rest of the industry in the region which the market share is being measured, that is either a particular SMSA all 17 SMSA's combined.

* Cochran, Sampling Techniques, John Wiley & Sons, Inc.

uantity may be assumed to have a probability distribution which is
ximately normal.

riance of s^{-1} depends on the variance of E and on the variance v(8994) of
timate of the average revenue per employee in the rest of the industry
is derived in Appendix E. The formula is

$$v(s^{-1}) = \frac{E^2\, v(8994) + 8994^2\, v(E)}{E_o^2 \times 12500^2}$$

andard deviation of s^{-1} is equal to $\sqrt{v(s^{-1})}$

pproximate standard deviation of the market share itself is

$$(s) = \left(\sqrt{v(s^{-1})} \right) \cdot s^2$$

rical values are shown in Tables C and C_2 next following.

Table C
MARKET SHARE BASED ON REVENUE

SMSA	E_o Number of Employees ADT and Affiliates	E Number of Employees Rest of Industry	$\sigma(E)$ Standard Deviation of E	$s=E_o \times 12500 \div [E_o \cdot 12500 + E \times 8994]$ Market Share of Defendant Alarm Companies	Standard Deviation of s

APPENDIX D

LISTING OF FIRMS IN SAMPLE SMSA'S

APPENDIX E

ESTIMATE OF AVERAGE REVENUE PER EMPLOYEE AND STANDARD DEVIATION OF AVERAGE FROM SAMPLE OF 55 DEPOSITIONS

Table E-1 lists the results of the sample of 55 depositions. From mple we calculated:

a) The mean of the figures of revenue per employee;

b) The standard deviation of these figures;

c) The standard deviation of the mean a) of these figures.

designate the revenue per employee of the ith deposition

$$\sigma^2 = \frac{\sum_{i=1}^{55} (X_i - X)^2}{55} = \frac{\sum_{i=1}^{55} X_i^2}{55} - \left(\frac{\sum_{i=1}^{55} X_i}{55} \right)^2$$

$$\sum X_i = 494,660$$

$$\sum X_i^2 = 5,022,839,200$$

= 3230

= mean revenue per employee = $8994

ndard deviation of the estimate of the sample mean is

$$\sigma(\bar{x}) = \frac{\sigma}{\sqrt{55}} = 435.6$$

ariance of the estimate of the sample mean is

$$(\bar{x}) = s^2(\bar{x}) = 189,747$$

[fol. 5757]

TABLE E-1

SAMPLE FOR ESTIMATING AVERAGE REVENUE PER EMPLOYEE

Name of Deposition	Annual Income per Employee
1. H. A. Walters, Electronic Co., Weco Alarm, Ace Alarm Co.; Indianapolis, Ind.	$ 5
2. W. W. Richardson, American Alarm Co.; Indianapolis, Ind.	5

Defendants' Exhibit WW-1

Morris J. Gottlieb

Dr. Gottlieb is a V.P. of Audits and Surveys, Inc., New York City. From 1961 to early 1964 he was a senior member of the professional Staff of Arthur D. Little, Inc. Earlier he was a Vice President of Market Facts, Inc. of Chicago, a national marketing research organization with which he was associated for eight years. Prior to that time he was a member of the Mathematics Department of the University of Chicago. At Market Facts, at Arthur D. Little, Inc. and now at Audits & Surveys, Inc. his principal activity has been the design and conduct of sample surveys to develop consumer and industrial marketing information.

His professional field is the application of mathematical and statistical techniques to market analysis. He received his Ph.D. in mathematics from Washington University.

Lester Frankel is the Executive Vice President of Audits and Surveys, Inc. His background is in the area of sample surveys. He worked for the Bureau of the Census, Dun & Bradstreet, and was for 8 years Senior Vice President at Alfred Politz Research. Mr. Frankel joined the company in 1957. He has been Adjunct Professor of Statistics at the Graduate School of Business Administration, New York University. Since its beginning, the Audits and Surveys Company has grown and at the present time is about the second or third largest company in the field of marketing research. Audits and Surveys is noted for its technical competence. It employs 150 people in its main office in New York City and uses about 2,000 interviewers spread throughout the country during the course of a year.

Dr. Peters received his Ph.D. in mathematics from Erlangen University in Germany.

He has been an actuary in life insurance and casualty insurance during the first twenty-seven years of his professional career. During that period he served for a long time on rate-making bodies for workmen's compensation insurance and had to appear frequently as a witness before rate regulatory authorities in order to justify rate changes recommended by the industry. He also has often testified as an actuarial expert before courts in automobile liability suits.

Prior to joining Arthur D. Little, Inc., in 1960, he was an Associate Professor of insurance at the University of California, and later a consulting actuary in the field of pension and profit-sharing plans.

At Arthur D. Little, Inc., Dr. Peters has worked on problems of cost analysis and performance evaluation in the field of transportation, on the statistical evaluation of biological experiments, and on the design and statistical analysis of market surveys, on problems of inventory control, of telephone communications and of information retrieval.

He is a Fellow of the Society of Actuaries, a Fellow of the Casualty Actuarial Society, and a member of the Institute of Mathematical Statistics. He has published several papers on mathematical and actuarial subjects in professional journals.
